

Professional and Consulting Services Sector Skills Framework Skills Dictionary

**Issued by Professional and Consulting Services
Sector Skills Council**

2025

Content disclaimer

This report is prepared **by the Professional and Consulting Services Sector Skill Council**, Kingdom of Saudi Arabia, in 2025. It is **intended for general informational purposes** only. The information present in this document is **compiled from sources considered reliable and accurate** by the Professional and Consulting Services Sector Skills Council and its participants. Although the Professional and Consulting Services Sector Skills Council exerts the utmost effort to ensure the accuracy and comprehensiveness of the information provided in this report.

However, the Professional and Consulting Services Sector Skill Council, its members, contributors, and the Ministry of Human Resources and Social Development **are not liable for any direct, indirect, or consequential loss or damage that may arise from the use of the information** contained in this report. The contents of this document report remain the property of the Professional and Consulting Services Sector Skill Council.

Introduction

This report serves as a **complementary publication to the comprehensive Professional and Consulting Services Sector Skills Framework Overview, Job Families, and Pathways** report. Its primary **purpose is to offer an in-depth view of technical as well as general skills** associated with the key job families within the Professional and Consulting Services Sector in the Kingdom of Saudi Arabia.

The **skills presented in this report aim to provide clarity** on the expected skills and proficiency levels necessary for professionals in the Professional and Consulting Services workforce. This **output shall serve as an invaluable input for multiple stakeholders**

Employers

use the skills dictionary as a reference for performance management, trainings and skill-based hiring strategies

Workforce

uses skills dictionary to gain clarity on required skills and proficiency expectations for professional growth as well as moving into new fields

Education and training entities

use skills dictionary to develop/ review curricula and training programs specific to the labor market skills demand

Policymakers

use skills dictionary to refine targeted workforce development policies

Alongside this report, a Professional and Consulting Services Skills Repository Excel Tool is also available. It provides list of technical and general skills mapped at sub-sector and job family level.

User can access Skills Repository Excel Tool

01

Priority Skills

This report focuses on **two main types of skills**: (1) Technical skills (2) General skills. This report **presents a detailed view on priority skills** for the Professional and Consulting Services sector across both categories, subsequently **tagged to the Professional and Consulting Services sub-sectors and job families**.

Technical skills

Technical skills are **sub-sector specific, specialized skills**. They **reflect the special needs** of the specific sector and sub-sectors. For example, consulting techniques, international trade legislation compliance, client needs assessment are specific skills required in the Professional and Consulting Services sector

General skills

General skills **are agnostic in nature** and required **across sub-sectors and job families**. For example, planning, communication, problem solving are common skills required across the Professional and Consulting Services sector

48 Professional and Consulting Services job families against which skills are mapped in each of the 6 sub-sectors

Legal	Accounting and Auditing
Legislative Research & Drafting 	Accounting Operations 
Litigation 	Business Valuation 
Mediation and Arbitrations 	Risk Management 
Corporate Structuring & M&A 	Audit Operations 
Specialized Legal Services & Advisory 	Accounting Analysis and Reporting 
Public Policy Management 	Bookkeeping 
Client/ Account Management 	Tax Planning and Operations 
Intellectual Property Services 	Restructuring and Insolvency 
Regulatory Compliance Reporting 	Regulatory Compliance Reporting 
Project Management 	Methodology Design 
Vendor/ Agency Management 	Quality Assurance and Control 
Notary 	

48 Professional and Consulting Services job families against which skills are mapped in each of the 6 sub-sectors

Management Consulting Services	Marketing, Advertising and Market Research
Expert Network Management 	Marketing Planning and Management 
Business Analysis 	Branding Management 
Capability Building 	Vendor/ Agency Management 
Product Management & Innovation 	Graphics Design

Regulatory Compliance Reporting 	Content Creation 
Project Management 	Digital Marketing 
Graphics Design 	Marketing & Communication 
Research & Analytics 	Client/ Account Management 
Intellectual Property Services 	Research and Analytics 
Marketing & Communication 	Intellectual Property Services 
Methodology Design 	Regulatory Compliance Reporting 

48 Professional and Consulting Services job families against which skills are mapped in each of the 6 sub-sectors

Priority technical skills identified across the job families within the Legal sub-sector

Sub-sector	Job family	Priority technical skills
Legal 	Legislative research and drafting 	• Business risk assessment and management • Client needs assessment • Content review and optimization • Copyright protection • Environmental awareness • International trade legislation compliance • Legal aptitude
	Litigation 	• Business risk assessment and management • Client needs assessment • Intellectual property enforcement • Legal aptitude
	Mediation and arbitrations 	• Client needs assessment • Legal aptitude
	Corporate structuring and M&A 	• Budget management • Business negotiation • Business risk assessment and management • Client needs assessment • Operational risk management • Regulatory compliance • Regulatory risk assessment
	Specialized Legal Services and Advisory 	• Business negotiation • Business risk assessment and management • Client needs assessment • Contract and vendor management • Corporate and business law application • Data privacy • Legal aptitude
	Public Policy Management 	• Budget management • Business risk assessment and management • Client needs assessment • Content review and optimization
	Client/account management 	• Account management • Client needs assessment • Ethical and professional conduct • Stakeholder engagement and management

Priority technical skills identified across the job families within the Legal sub-sector

Sub-sector	Job family	Priority technical skills
Legal 	Intellectual property services 	• Budget management • Business risk assessment and management • Copyright protection • Intellectual property commercialisation and exploitation • Intellectual property enforcement • Intellectual property intelligence • Intellectual property strategy • Trademark application
	Regulatory compliance reporting 	• Budget management • Corporate and business law application • Cyber and data breach incident management • Cyber security threat and risk management • Data migration • Data privacy • Environmental awareness • International trade legislation compliance • Legal compliance management • Management of breach in compliance requirements • Market risk management • Operational risk management • Professional and business ethics • Regulatory risk assessment • Systems thinking application
	Project management 	• Business negotiation • Client needs assessment • Consulting techniques • Environmental awareness • Ethical and professional conduct • Impact evaluation • Legal project management • Process mapping and analysis • Project risk management
	Vendor/Agency management 	• Budget management • Business negotiation • Change management • Client needs assessment • Contract and vendor management • Data ethics • Data governance • Data migration • Data privacy • Data protection management • Ethical and professional conduct • Market research and analysis

Priority technical skills identified across the job families within the Legal sub-sector

Sub-sector	Job family	Priority technical skills
Legal 	Vendor/Agency management	• Organizational strategic planning • Policy development • Process mapping and analysis • Stakeholder engagement and management • Strategy development and implementation management

Priority general skills identified and mapped against the Legal sub-sector

Sub-sector	Priority general skills
Legal 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Priority technical skills identified across the job families within the Accounting and Auditing sub-sector

Sub-sector	Job family	Priority technical skills
Accounting and Auditing 	Accounting Operations 	• Account management • Application of AI in risk analysis • Big data analysis • Budget management • Business acumen • Business process analysis and management • Capital expenditure and investment evaluation • Data migration • Data mining • ERP system proficiency • Financial modelling • Reconciliation platforms utilization • Regulatory risk assessment
	Business valuation 	• Application of AI in risk analysis • Big data analysis • Business acumen
	Risk management 	• Application of AI in risk analysis • Blockchain-based tools auditing skills • Business acumen • Business continuity strategy and planning • Business process analysis and management • Cyber security threat and risk management • Cybersecurity awareness in accounting • Operational risk management • Project risk management • Regulatory risk assessment
	Audit operations 	• Application of AI in risk analysis • Big data analysis • Blockchain-based tools auditing skills • Business acumen • Business risk assessment and management • Data migration • Forensic accounting • Regulatory risk assessment

Priority technical skills identified across the job families within the Accounting and Auditing sub-sector

Sub-sector	Job family	Priority technical skills
Accounting and Auditing 	Accounting Analysis and Reporting 	• Advanced excel skills • Application of AI in risk analysis • Big data analysis • Blockchain-based tools auditing skills • Data analytics and system optimization • Data migration • Data mining • Financial modelling • International accounting standards • Sustainability reporting
	Bookkeeping 	• Account management • Budget management • Business risk assessment and management • Capital expenditure and investment evaluation • Customer Relationship Management (CRM) strategy and systems • Data migration • Data mining
	Tax planning and operations 	• Application of AI in risk analysis • Big data analysis • Corporate and business law application • Data analytics and system optimization • Data backup and recovery • Data migration • Data mining • Data privacy • Process design • Process mapping and analysis • Professional and business ethics • Reconciliation platforms utilization • Stakeholder engagement and management
	Restructuring and insolvency 	• Big data analysis • Business acumen • Business negotiation • Reconciliation platforms utilization
	Regulatory compliance reporting 	• Big data analysis • Blockchain-based tools auditing skills • Budget management • Corporate and business law application • Data mining • Data privacy • International trade legislation compliance • Legal compliance management • Management of breach in compliance requirements

Priority technical skills identified across the job families within the Accounting and Auditing sub-sector

Sub-sector	Job family	Priority technical skills
Accounting and Auditing 	Regulatory compliance reporting	• Operational risk management • Professional and business ethics • Regulatory compliance • Regulatory risk assessment
	Methodology design 	• Budget management • Business continuity strategy and planning • Business environment analysis • Business negotiation • Change management • Contract and vendor management • Data analytics and system optimization • Data governance • Data mining • International trade legislation compliance • Legal compliance management • Manpower forecasting and planning • Process improvement and optimisation • Product testing management • Project feasibility assessment • Project management • Proposal writing development • Research data analysis • Research findings communication • Stakeholder engagement and management • Strategic service excellence management • Strategy development and implementation management • Systems thinking application • Technical report writing
	Quality assurance and control 	• Application of AI in risk analysis • Change management • Data analytics and system optimization • Data backup and recovery • Data mining • Data privacy • Process design • Process mapping and analysis • Product design and development • Product testing management • Project management • Reconciliation platforms utilization • Technical report writing

Priority general skills identified and mapped against the Accounting and Auditing sub-sector

Sub-sector	Priority general skills
Accounting and Auditing 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Priority technical skills identified across the job families within the Management Consulting Services sub-sector

Sub-sector	Job family	Priority technical skills
Management Consulting Services 	Expert network management 	• Business continuity strategy and planning • Business data analysis • Business environment analysis • Business innovation and improvement • Business intelligence • Business networking • Business process analysis and management • Strategy design • Systems thinking application
	Business Analysis 	• Application of AI in risk analysis • Budget management • Business environment analysis • Business innovation and improvement • Business needs analysis • Business process re-engineering • Business risk assessment and management • Capital expenditure and investment evaluation • Change management • Demand and supply analysis • ESG risk management • Financial modelling • Manpower forecasting and planning • Market evaluation • Market research and analysis • Organisational planning and target setting • Organisational strategy and policy realisation • Organizational strategic planning • Process design • Stakeholder engagement and management • Strategic research • Strategy development and implementation management • Systems thinking application
	Capability building 	• Business data analysis • Business environment analysis • Business innovation and improvement • Business needs analysis • Business networking • Business opportunities development • Business process analysis and management • Business risk assessment and management • Business strategy concepts • Learning and development strategy • Learning needs analysis

Priority technical skills identified across the job families within the Management Consulting Services sub-sector

Sub-sector	Job family	Priority technical skills
Management Consulting Services 	Product management and innovation 	• Application of AI in risk analysis • Big data analysis • Budget management • Business innovation and improvement • Business networking • Business performance and planning management • Business risk assessment and management • Contract and vendor management • Cyber security threat and risk management • Data analytics and system optimization • Environmental awareness • Market evaluation • Marketing opportunities assessment • Marketing strategy • Product design and development • Product testing management • Strategy design • Systems thinking application
	Client/account management 	• Account management • Business opportunities development • Business performance and planning management • Client needs assessment • Strategy design • Systems thinking application
	Regulatory compliance reporting 	• Budget management • Business performance and planning management • Business risk assessment and management • Corporate and business law application • Cyber and data breach incident management • Data mining • Data privacy • ESG risk management • International trade legislation compliance • Legal compliance management • Management of breach in compliance requirements • Market risk management • Operational risk management • Professional and business ethics • Regulatory risk assessment • Sustainability reporting • Systems thinking application
	Project management 	• Application of AI in risk analysis • Business innovation and improvement • Business negotiation • Client needs assessment • Consulting techniques

Priority technical skills identified across the job families within the Management Consulting Services sub-sector

Sub-sector	Job family	Priority technical skills
Management Consulting Services 	Project management	• Environmental awareness • Impact evaluation • Manpower forecasting and planning • Process mapping and analysis • Project feasibility assessment • Project management • Project risk management • Strategy design • Systems thinking application • Technical report writing
	Graphics design 	• Immersive design and video editing
	Research and analytics 	• Application of AI in risk analysis • Budget management • Business environment analysis • Business innovation and improvement • Business negotiation • Business networking • Business opportunities development • Business performance and planning management • Capital expenditure and investment evaluation • Client needs assessment • Contract and vendor management • Data analytics and system optimization • Demand and supply analysis • Market research and analysis • Research data analysis • Research findings communication • Systems thinking application
	Intellectual property services 	• Budget management • Business data analysis • Business risk assessment and management • Intellectual property commercialisation and exploitation • Intellectual property enforcement • Intellectual property intelligence • Intellectual property strategy • Strategy design • Trademark application

Priority technical skills identified across the job families within the Management Consulting Services sub-sector

Sub-sector	Job family	Priority technical skills
Management Consulting Services 	Marketing and communication 	• Budget management • Business networking • Business risk assessment and management • Content review and optimization • Contract and vendor management • Customer Relationship Management (CRM) strategy and systems • Digital marketing and communication • Market research and analysis • Marketing opportunities assessment • Marketing strategy • Proposal writing development
	Methodology design 	• Budget management • Business continuity strategy and planning • Business environment analysis • Business innovation and improvement • Business negotiation • Business networking • Business performance and planning management • Process improvement and optimisation • Research findings communication • Strategic service excellence management • Systems thinking application • Technical report writing

Priority general skills identified and mapped against the Management Consulting Services sub-sector

Sub-sector	Priority general skills
Management Consulting Services 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Priority technical skills identified across the job families within the Marketing, Advertising, and Market Research sub-sector

Sub-sector	Job family	Priority technical skills
Marketing, Advertising, and Market Research 	Marketing planning and management 	• Below-the-line marketing technique • Budget management • Business data analysis • Business innovation and improvement • Business networking • Business performance and planning management • Business strategy concepts • Customer behavior analysis • Customer Relationship Management (CRM) strategy and systems • Digital marketing and communication • Market research and analysis • Marketing strategy • Strategy design
	Branding management 	• Business continuity strategy and planning • Business networking • Business risk assessment and management • Customer Relationship Management (CRM) strategy and systems • Market research and analysis • Strategy design
	Marketing and communication 	• Budget management • Business data analysis • Business networking • Business risk assessment and management • Content review and optimization • Customer Relationship Management (CRM) strategy and systems • Digital content creation • Digital marketing and communication • Market research and analysis • Marketing opportunities assessment • Marketing strategy • Proposal writing development • Strategy design
	Vendor/Agency management 	• Budget management • Business data analysis • Business negotiation • Business opportunities development • Business performance and planning management • Change management • Client needs assessment • Customer behavior analysis • Data analytics and system optimization • Data ethics • Data governance • Data migration

Priority technical skills identified across the job families within the Marketing, Advertising, and Market Research sub-sector

Sub-sector	Job family	Priority technical skills
Marketing, Advertising, and Market Research 	Vendor/Agency management	• Data privacy • Data protection management • Ethical and professional conduct • Impact evaluation • Market research and analysis • Organizational strategic planning • Policy development • Process mapping and analysis • Stakeholder engagement and management • Strategy development and implementation management
	Product marketing 	• Business networking • Business risk assessment and management • Content review and optimization • Customer Relationship Management (CRM) strategy and systems • Data analytics and system optimization • Market research and analysis
	Content creation 	• Budget management • Content personalization • Immersive design and video editing • Strategic research
	Digital marketing 	• Budget management • Digital marketing and communication • Market research and analysis
	Client/account management 	• Business needs analysis • Business opportunities development • Business performance and planning management • Client needs assessment • Customer behavior analysis • Customer Relationship Management (CRM) strategy and systems • Data analytics and system optimization • Data backup and recovery • Data ethics • Data governance • Data migration • Data mining • Data privacy • Data protection management

Priority technical skills identified across the job families within the Marketing, Advertising, and Market Research sub-sector

Sub-sector	Job family	Priority technical skills
Marketing, Advertising, and Market Research 	Client/account management	• Ethical and professional conduct • Impact evaluation • Market evaluation • Policy development • Reconciliation platforms utilization • Stakeholder engagement and management • Strategy design • Strategy development and implementation management
	Intellectual property services 	• Budget management • Business data analysis • Business environment analysis • Business negotiation • Business opportunities development • Business risk assessment and management • Change management • Contract and vendor management • Copyright protection • Intellectual property commercialisation and exploitation • Intellectual property enforcement • Intellectual property intelligence • Market research and analysis • Organisational strategy and policy realisation • Project management • Project risk management • Trademark application
	Regulatory compliance reporting 	• Business performance and planning management • Data ethics • Data governance • Data mining • Data privacy • Data protection management • International trade legislation compliance • Legal compliance management • Market risk management • Regulatory risk assessment
	Graphics design 	• Customer journey mapping • Immersive design and video editing

Priority technical skills identified across the job families within the Marketing, Advertising, and Market Research sub-sector

Sub-sector	Job family	Priority technical skills
Marketing, Advertising, and Market Research 	Research and analytics 	• Budget management • Business environment analysis • Business innovation and improvement • Business negotiation • Business networking • Business opportunities development • Customer behavior analysis • Data analytics and system optimization • Impact evaluation • Research data analysis • Research findings communication

Priority general skills identified and mapped against the Marketing, Advertising, and Market Research Services sub-sector

Sub-sector	Priority general skills
Marketing, Advertising, and Market Research 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Priority technical skills identified across the job families within the Research and Development sub-sector

Sub-sector	Job family	Priority technical skills
Research and Development 	Statistical Analysis and Interpretation 	• Big data analysis • Budget management • Business continuity strategy and planning • Business data analysis • Business environment analysis • Business innovation and improvement • Business needs analysis • Business negotiation • Business risk assessment and management • Data analytics and system optimization • Research data analysis • Research findings communication • Strategic research
	Research planning and strategy 	• Budget management • Business continuity strategy and planning • Business environment analysis • Business innovation and improvement • Business negotiation • Business opportunities development • Ethical and professional conduct • Process mapping and analysis • Research data analysis • Research findings communication • Strategic service excellence management
	Ethnographic/scientific research 	• Budget management • Business continuity strategy and planning • Change management • Customer behavior analysis • Data analytics and system optimization • Ethical and professional conduct • Process improvement and optimisation • Technical report writing
	Methodology design 	• Budget management • Business continuity strategy and planning • Business environment analysis • Business innovation and improvement • Business negotiation • Process improvement and optimisation • Process mapping and analysis • Research findings communication • Strategic service excellence management • Technical report writing

Priority technical skills identified across the job families within the Research and Development sub-sector

Sub-sector	Job family	Priority technical skills
Research and Development 	Health and safety 	• Application of AI in risk analysis • Budget management • Business continuity strategy and planning • Business negotiation • Change management • Contract and vendor management • Manpower forecasting and planning • Market research and analysis • Operational risk management • Project management • Stakeholder engagement and management • Strategy development and implementation management • Technical report writing
	Design engineering 	• Business negotiation • Business opportunities development • Business risk assessment and management • Data analytics and system optimization • Immersive design and video editing
	Quality assurance and control 	• Application of AI in risk analysis • Change management • Data analytics and system optimization • Data backup and recovery • Data mining • Data privacy • Process design • Process mapping and analysis • Product design and development • Product testing management • Project management • Reconciliation platforms utilization • Technical report writing
	Data collection and management 	• Big data protection • Budget management • Business continuity strategy and planning • Business innovation and improvement • Business needs analysis • Business risk assessment and management • Cyber and data breach incident management • Data analytics and system optimization • Data backup and recovery • Data ethics • Data governance • Data migration • Data mining • Data privacy • Data protection management

Priority technical skills identified across the job families within the Research and Development sub-sector

Sub-sector	Job family	Priority technical skills
Research and Development 	Product management and innovation 	• Application of AI in risk analysis • Big data analysis • Business innovation and improvement • Business opportunities development • Business risk assessment and management • Cyber security threat and risk management • Data analytics and system optimization • Environmental awareness • Market evaluation • Marketing opportunities assessment • Marketing strategy • Product design and development • Product testing management
	Intellectual property services 	• Budget management • Business data analysis • Business risk assessment and management • Copyright protection • Intellectual property commercialisation and exploitation • Intellectual property enforcement • Intellectual property intelligence • Intellectual property strategy

Priority general skills identified and mapped against the Research and Development sub-sector

Sub-sector	Priority general skills
Research and Development 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Priority technical skills identified across the job families within the Human Resources sub-sector

Sub-sector	Job family	Priority technical skills
Human Resources 	Talent management 	• Budget management • Business networking • Business performance and planning management • Business risk assessment and management • Change management • Competency assessment • Human resource advisory • Job analysis and evaluation • Strategy design
	Learning and development management 	• Business performance and planning management • Career coaching and development • Career framework design • Competency assessment • Human resource advisory • Learning and development strategy • Learning needs analysis • Strategy design
	Employee experience 	• Business networking • Change management • Human resource advisory • Policy development
	Onboarding 	• Job analysis and evaluation • Policy development
	Organizational development 	• Budget management • Business continuity strategy and planning • Business networking • Business performance and planning management • Business risk assessment and management • Company external factors analysis • Ethical and professional conduct • Organisational design • Organisational strategy and policy realisation • Organizational strategic planning • Policy development • Process improvement and optimisation

Priority technical skills identified across the job families within the Human Resources sub-sector

Sub-sector	Job family	Priority technical skills
Human Resources 	Performance and rewards management 	• Human resource advisory • Job analysis and evaluation • Strategy design
	Human Resource Information Systems (HRIS) 	• Big data analysis • Business data analysis • Human resource advisory • Human resource analytics and insights • Policy development
	HR Business Partner 	• Change management • Ethical and professional conduct • Human resource advisory • Manpower forecasting and planning • Policy development • Strategy design

Priority general skills identified and mapped against the Human Resources sub-sector

Sub-sector	Priority general skills
Human Resources 	• Literacy • Numeracy • Digital literacy • Financial literacy • Health literacy • Learning to learn • Planning • Self management • Communication • Cultural intelligence • People management • Teamwork • Critical thinking • Decision making • Innovation & creative thinking • Problem solving • Adaptability • Information processing • Leadership • Sustainability literacy • Emotional intelligence

Skills Dictionary

Skills dictionary presents a compiled view on the priority skills across the sector. A skill charter is structured in a way that outlines **the key abilities, knowledge, and contextual understanding required to achieve a specific proficiency for a particular skill**. It provides clear guidance on how a skill should **be demonstrated and performed**. Skill charters can be used as a tool for assessment, training, policy development, etc. to ensure that the sector workforce is acquiring and applying skills in line with industry requirements.

This report presents charters **for both technical and general skills** in the subsequent section.

Introduction to technical skill charters

Technical skill charters are meticulously developed to provide an in-depth reference guide for priority technical skills necessary for professionals within the sector as per the needs of the labor market in the Kingdom. These charters are designed to offer detailed insights into the specific technical skills that align with industry requirements, focusing on the practical and specialized knowledge that is needed.

In the section ahead, technical skill charters are present which outline in a structured way the following elements:

- (1) Skill description
- (2) Relevant sub-sector(s) that the skill is applicable to
- (3) Relevant job families that the skill is applicable to
- (4) Proficiency descriptions (on a scale of 1-5 levels)

Skill description	Offers a detailed explanation of the skill, its scope, purpose, and relevance to the sector. It outlines what the skill entails and how it applies to the work environment
Sub-sector applicable	Skills are tagged to the respective sub-sectors in Professional and Consulting Services sector : (1) Legal (2) Accounting and Auditing, (3) Management Consulting Services (4) Marketing, Advertising, and Market Research (5) Research and Development (6) Human Resources reflecting which sub-sectors require the specific skill
Relevant job families	Skills are mapped to specific job families , providing clarity on which job families the skill is required for
Proficiency descriptions	Offers the description on the expected performance to be showcased at various proficiency levels by professionals. Technical skills' proficiency is measured on a scale starting from level 1 and progressing to level 5. The levels from 1 to 5 are standard for proficiency measurement of technical skills and are defined as follows: • Level 1: At this level, professionals recognize and apply appropriate policies, procedures, and practices in the planning, preparation, and execution of work activities • Level 2: At this level, professionals design, analyze, and interpret policies, standards, procedures and practices to ensure compliance with the system • Level 3: At this level, professionals facilitate the development and implementation of procedures in control of operations, maintenance, and other work activities • Level 4: At this level, professionals evaluate, synthesize, and integrate systems to ensure effective implementation for the control of operations, maintenance and other work activities • Level 5: At this level, professionals set direction and strategy for systems to meet the organization's objectives

Technical skill charter

Account management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Account management		
Skill description	Manage, maintain and grow the sales and relationships with a specific customer or set of accounts. This includes in-depth customer engagement, relationship-building and provision of quality solutions and service to address customers' needs efficiently and generate revenue.		
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 		
Relevant job families	Bookkeeping	Accounting Operations	Client/account management
Proficiency description	LEVEL 1 - Perform sales activities for assigned clients or accounts following a standard process, and execute day-to-day sales administrative activities - Understand and apply basic communication and negotiation techniques for client interactions - Recognize key account metrics to track engagement and performance - Maintain client records in line with organizational guidelines and demonstrate an understanding of account-specific services LEVEL 2 - Engage with customers, providing solutions, gathering feedback and managing customer satisfaction for a given account - Leverage CRM tools to analyze client data and improve satisfaction - Contribute to creating client engagement plans based on feedback and performance trends - Assist in designing account management strategies - Ensure compliance with client agreements and service standards LEVEL 3 - Analyze customer profitability and develop strategies and processes to cater to various customer accounts, manage customer satisfaction, maximize account value, and address current and projected customer needs - Coordinate cross-functional teams to address complex client needs and improve service delivery - Facilitate client relationship development - Implement account growth initiatives LEVEL 4 - Evaluate and synthesize client engagement strategies - Integrate account management systems to improve customer satisfaction and account growth - Recommend and implement improvements to account management practices - Drive the integration of data-driven insights into account strategies for market competitiveness LEVEL 5 - Establish organizational direction in managing customer accounts, and develop an account management framework (incorporating AI-driven insights for predictive analytics) and customer service strategy - Establish long-term account management approaches - Develop key performance indicators to monitor and grow strategic accounts		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Advanced excel skills

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Advanced excel skills				
Skill description	Create complex financial models, dashboards, and data analyzes using Excel's advanced functions. Automate processes with macros and optimize data visualization for reporting. Ensure accuracy in data manipulation and problem-solving				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development  Human resources 
Relevant job families	Accounting Analysis and Reporting				
Proficiency description	LEVEL 1 - Apply basic Excel functions to manage and organize data effectively - Follow established procedures to create simple reports - Apply basic data visualization techniques like inserting basic charts (e.g., pie or bar charts) - Sort and filter data effectively to organize large datasets				
	LEVEL 2 - Design and update spreadsheets for financial analysis and reporting - Utilize pivot tables and advanced formulas - Introduce conditional formatting to highlight key data trends - Implement simple data validation rules for improved input quality				
	LEVEL 3 - Analyze customer profitability and develop strategies to maximize account value - Coordinate cross-functional teams to address complex client needs and improve service delivery, ensuring accuracy in data manipulation and reporting - Facilitate complex data analysis with advanced Excel functions - Automate recurring tasks by creating and managing macros				
	LEVEL 4 - Evaluate and synthesize large data sets using Excel - Integrate complex financial models and tools for optimization - Ensure advanced Excel usage in decision-making and problem-solving - Create dynamic dashboards using interactive tools such as slicers and advanced charting techniques - Conduct scenario analysis and sensitivity analysis using Excel's What-If tools				
	LEVEL 5 - Develop organizational Excel training programs for workforce upskilling - Evaluate emerging Excel add-ins and tools for enterprise-level implementation - Oversee the integration of Excel tools into comprehensive data systems - Set strategies to optimize Excel-based processes and incorporate AI-powered tools that go beyond Excel's native capabilities for automation and insights, (i.e., Power Query, VBA or Power BI)				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Application of AI in risk analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Application of AI in risk analysis					
Skill description	Utilize artificial intelligence tools to identify, assess, and mitigate potential risks and detect false information, enhancing decision-making and risk management					
Sub-sector	Legal 	 Accounting and auditing 	 Management consulting services 	Marketing advertising and market research 	 Research and development 	Human resources 
Relevant job families	Product management & innovation	Accounting Operations	Project management	Risk management	Business Analysis	Health and safety
	Accounting Analysis and Reporting	Audit Operations	Business valuation	Research and analytics	Tax planning and operations	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize AI tools and their application in risk management - Follow guidelines for assessing potential risks - Demonstrate knowledge of basic AI algorithms - Learn how AI identifies and categorizes risks using machine learning techniques - Understand data requirements and ethical considerations in AI-driven risk LEVEL 2 - Review and Apply AI tools for automated risk detection - Apply simple AI tools to detect and classify risks in structured datasets - Understand, review, and interpret outputs from supervised learning models for predictive risk assessments - Use visualization tools to communicate AI-driven risk insights effectively LEVEL 3 - Develop predictive models using machine learning algorithms like random forests or neural networks - Automate risk monitoring systems to provide real-time alerts using AI tools - Perform advanced feature engineering to improve AI model accuracy in risk analysis - Integrate AI insights into decision-making processes - Ensure compliance with risk management protocols LEVEL 4 - Lead cross-functional teams to deploy scalable AI solutions for enterprise-level risk analysis - Evaluate AI risk management systems and ensure AI models comply with industry standards and regulatory requirements for risk management - Synthesize data-driven insights from AI tools - Integrate AI into comprehensive risk analysis and control strategies LEVEL 5 - Shape organizational AI policies to align with global risk management trends and ethical standards (e.g., advanced machine learning models, ethical AI practices, and integrating AI across multiple business units) - Explore and adapt cutting-edge AI technologies (e.g., deep learning, reinforcement learning) for emerging risk challenges - Develop AI-driven risk analysis frameworks - Establish use cases for AI development in business requirement to enhance potential businesses outcomes					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Below-the-line marketing technique

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Below-the-line marketing technique
Skill description	Implement marketing techniques that engage consumers directly with products through tasting, touching, or experiencing them at the point of sale, driving immediate purchasing decisions and enhancing brand interaction
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Marketing planning and management
Proficiency description	LEVEL 1 - Recognize basic below-the-line marketing methods - Apply techniques such as product sampling at point of sale - Demonstrate knowledge of direct consumer engagement LEVEL 2 - Analyze consumer interaction data at sales points - Ensure compliance with brand guidelines during execution - Execute and test the designed below-the-line campaigns LEVEL 3 - Facilitate the execution of below-the-line marketing strategies - Implement experiential marketing techniques to enhance brand interaction - Measure campaign effectiveness LEVEL 4 - Evaluate and synthesize the impact of below-the-line marketing activities - Integrate consumer feedback into future campaigns - Ensure alignment with broader marketing strategies LEVEL 5 - Set strategy for below-the-line marketing initiatives - Direct comprehensive consumer engagement programs - Establish guidelines for optimizing brand interaction and immediate purchasing behavior

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Big data analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Big data analysis				
Skill description	Analyze and interpret large volumes of raw data to uncover trends, patterns, and correlations, enabling data-driven decision-making and strategic insights, while applying decision-making skills and big data techniques in day-to-day operations				
Sub-sector	Legal 	 Accounting and auditing	 Management consulting services	 Marketing advertising and market research	 Research and development  Human resources
Relevant job families	Statistical Analysis and Interpretation	Accounting Analysis and Reporting	Accounting Operations	Regulatory compliance reporting	Human Resource Information Systems (HRIS)
	Product management and innovation	Audit Operations	Business valuation	Restructuring and insolvency	Tax planning and operations
Proficiency description	LEVEL 1 - Recognize and apply basic data analysis techniques - Follow procedures for collecting and organizing raw data - Demonstrate knowledge of key statistical methods				
	LEVEL 2 - Analyze data sets using statistical and analytical methods - Design reports and visualizations to communicate insights				
	LEVEL 3 - Facilitate the use of big data in decision-making processes - Identify key trends and insights for business optimization - Utilize advanced data processing tools - Ensure compliance with data analysis standards				
	LEVEL 4 - Evaluate and integrate complex data sources to provide strategic business insights - Develop frameworks for data-driven decision-making processes				
	LEVEL 5 - Set strategies for leveraging big data analysis for business growth - Direct data-driven decision-making across the organization - Establish standards for data interpretation and analytics - Introduce high-level topics such as predictive analytics, AI integration, and machine learning techniques in data analysis to the organization				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Big data protection

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Big data protection
Skill description	Protect and monitor the integrity of transactional and non-transactional big data in an organization. It involves activities such as securing big data sets, enforcing security and privacy policies, conducting real-time data integrity checks, and managing responses to data breach incidents
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Data collection and management
Proficiency description	LEVEL 1 - Follow standard procedures for securing large data sets - Identify basic data protection measures - Understand basic privacy guidelines LEVEL 2 - Design methods for data protection - Analyze privacy and security policies - Ensure systems are compliant with data regulations LEVEL 3 - Ensure to coordinate a real-time monitoring of data integrity - Implement big data security measures - Address data breaches with appropriate response strategies LEVEL 4 - Synthesize ongoing security measures into operational processes - Assess and integrate advanced data protection frameworks - Ensure high-level system integrity LEVEL 5 - Establish policies to mitigate data risks - Formulate long-term data protection strategies - Implant comprehensive data security protocols

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Blockchain-based tools auditing skills

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Blockchain-based tools auditing skills			
Skill description	Understand the fundamental principles and functionalities of blockchain technology and its auditing applications			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 
Relevant job families	Audit Operations	Risk management	Accounting analysis and reporting	Regulatory compliance reporting
Proficiency description	LEVEL 1 - Apply auditing protocols for blockchain transactions - Demonstrate basic understanding of blockchain functionality LEVEL 2 - Develop audit frameworks for blockchain systems - Identify the core principles of blockchain technology - Interpret blockchain data for audit purposes LEVEL 3 - Coordinate risk management in blockchain audits - Implement blockchain auditing tools - Monitor and ensure blockchain integrity in auditing processes LEVEL 4 - Synthesize audit findings to inform risk mitigation strategies - Assess and integrate blockchain tools into auditing frameworks - Ensure regulatory compliance LEVEL 5 - Establish frameworks for auditing blockchain operations - Define strategic blockchain auditing policies - Shape efforts to innovate and refine blockchain auditing processes			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Budget management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 										
Skill name	Budget management										
Skill description	Manage and oversee budget systems and processes to track and ensure efficient use of resources, while preparing organizational budgets through forecasting, allocation, and financial policy setting to support both short- and long-term business plans										
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 										
Relevant job families	Corporate structuring and M&A	Research planning and strategy	Methodology design	Ethnographic/scientific research	Digital marketing	Statistical Analysis and Interpretation	Data collection and management	Health and safety	Content creation	Marketing and communication	Regulatory compliance reporting
	Business Analysis	Marketing planning and management	Vendor/Agency management	Bookkeeping	Accounting Operations	Intellectual property services	Product management and innovation	Public Policy Management	Research and analytics	Talent management	Organizational development
Proficiency description	LEVEL 1 - Track expenditures and ensure alignment with budgetary guidelines - Identify basic budgeting methods - Understand the fundamentals of financial reporting										
	LEVEL 2 - Create forecasting models to predict financial trends - Analyze organizational budgets for accuracy - Assess operating costs and expenditures and ensure adherence to established budgets										
	LEVEL 3 - Develop budgets for organizational operations and propose strategies to maximize revenues for the organization - Implement budgeting systems across departments - Ensure adherence to financial regulations - Adjust budgets to reflect operational changes										
	LEVEL 4 - Synthesize financial insights into resource allocation strategies - Allocate financial resources to meet organizational goals - Evaluate budget performance across multiple departments - Ensure strategic alignment with financial regulations - Demonstrate expertise in financial planning and budget management operations										
	LEVEL 5 - Drive annual budget plan, budget governance and control - Establish long-term financial frameworks - Set strategic budgeting policies - Shape the development of budget models that drive organizational growth - Ensure alignment of budgeting decisions with long-term goals and strategies - Develop strategies to attain commercial objectives of the organization										

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Business acumen

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Business acumen				
Skill description	Understand and apply business principles and practices to analyze client needs and leverage industry knowledge, financial insights, and market trends to drive effective decision-making and achieve projects goals.				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development  Human resources 
Relevant job families	Audit Operations	Business valuation	Accounting Operations	Risk management	Restructuring and insolvency
Proficiency description	LEVEL 1 - Understand basic industry terminology and concepts - Identify key components of financial reports like revenue and expenses - Follow organizational procedures and workflows to understand operational processes - Ask clarifying questions to improve understanding of business contexts LEVEL 2 - Analyze market trends and their impact on organizational performance - Assist in identifying risks and opportunities in business projects - Collaborate with teams to create operational improvement suggestions - Present findings from simple business analyses to supervisors LEVEL 3 - Develop business cases that align with strategic objectives - Use financial data to recommend process improvements and cost-saving measures - Collaborate across departments to evaluate business opportunities - Design frameworks to assess business performance against KPIs LEVEL 4 - Evaluate and refine business models to increase efficiency and profitability - Develop tools or dashboards to provide real-time insights to senior management LEVEL 5 - Advocate for industry best practices and innovative business strategies - Design global business frameworks to standardize practices across regions - Influence policymaking and industry standards through active participation in forums				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Business continuity strategy and planning

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 									
Skill name	Business continuity strategy and planning									
Skill description	Develop and implement robust business continuity strategies and plans to manage risks and ensure organizational resilience during disruptive events. Establish and maintain contingency systems to safeguard critical processes, systems, and stakeholders, ensuring continued operations									
Sub-sector	Legal 	Accounting and auditing 		Management consulting services 		Marketing advertising and market research 		Research and development 	Human resources 	
Relevant job families	Health and safety	Methodology design	Research planning and strategy	Ethnographic/scientific research	Statistical Analysis and Interpretation	Data collection and management	Branding management	Organizational development	Risk management	Expert network management
Proficiency description	LEVEL 1 - Follow established procedures to maintain core operations during disruptions - Identify basic elements of business continuity plans - Understand contingency strategies									
	LEVEL 2 - Assist in developing continuity strategies to protect critical business functions - Analyze potential risks and disruptions - Ensure business resilience plans meet regulatory requirements									
	LEVEL 3 - Coordinate stakeholder communication during crises - Implement business continuity frameworks - Facilitate the recovery of critical operations - Facilitate the development of business continuity strategies and plans - Ensure development of business continuity strategies and plans									
	LEVEL 4 - Integrate crisis management strategies into core processes - Evaluate and synthesize continuity measures across the organization - Ensure high resilience across operations - Leverage expertise in the development of specific risk mitigation strategies for business-critical functions in response to crisis situations									
	LEVEL 5 - Establish comprehensive frameworks for crisis management - Define strategic business continuity plans - Shape initiatives to ensure uninterrupted operations during major disruptions - Formulate strategies and guidelines for the development and implementation of business continuity plan to ensure rapid responses during disruptive events									

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Business data analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Business data analysis			
Skill description	Implementing data analytics within the organization to generate business insights and intelligence through the use of statistical and computational techniques and tools, algorithms, predictive data modelling and data visualization			
Sub-sector	Legal 	Accounting and auditing 	 Management consulting services 	 Marketing advertising and market research   Research and development   Human resources 
Relevant job families	Expert network management	Vendor/ Agency management	Marketing and communication	Human Resource Information Systems (HRIS)
	Marketing planning and management	Statistical Analysis and Interpretation	Capability building	Intellectual property services
Proficiency description	LEVEL 1 - Recognize key data collection techniques - Understand the importance of accuracy in data handling - Learn and apply basic descriptive statistics (e.g., mean, median, standard deviation) - Familiarize with common data visualization tools (e.g., charts, graphs)			
	LEVEL 2 - Utilize tools like Excel or Tableau to create visual dashboards for data trends - Apply inferential statistics (e.g., hypothesis testing) to draw meaningful insights - Ensure data interpretation aligns with business objectives - Apply data extraction and analysis using software and business intelligence tools to extract financial and non-financial information and generate reports			
	LEVEL 3 - Build predictive models using tools like Python, R, or similar software to enhance business insights - Conduct data cleaning and preparation to ensure high-quality datasets for analysis - Implement advanced data analysis methods to support decision-making - Analyze financial and non-financial information using analytics and business intelligence tools			
	LEVEL 4 - Integrate data from multiple sources (e.g., databases, APIs) to create comprehensive analysis - Develop frameworks for real-time analytics to support agile decision-making - Integrate advanced analytics into operational processes - Evaluate the effectiveness of data analysis in driving business strategy - Ensure compliance with data quality standards - Formulate forensic data analysis plans and policies			
	LEVEL 5 - Innovate in the use of emerging technologies like AI for advanced analytics and insights - Establish advanced data governance frameworks - Define strategic direction for business analytics - Shape the use of data insights to inform long-term business strategy - Conduct scenario analysis approach to provide alternative insights to users and decision makers

Business process analysis and management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Business process analysis and management			
Skill description	Analyze, manage, and optimize business processes to enhance efficiency, effectiveness, and overall organizational performance, ensuring continuous improvement and alignment with business goals			
Sub-sector	Legal 	 Accounting and auditing	 Management consulting services	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Expert network management	Capability building	Risk management	Accounting Operations
Proficiency description	LEVEL 1 - Identify basic components of business processes - Understand the importance of process optimization - Follow procedures for tracking process performance			
	LEVEL 2 - Design frameworks for analyzing business processes - Analyze workflows for potential inefficiencies - Ensure alignment with business goals and efficiency standards			
	LEVEL 3 - Facilitate the optimization of business processes - Apply advanced techniques for process analysis - Integrate improvements into workflows for increased efficiency			
	LEVEL 4 - Evaluate process performance and organizational impact - Synthesize findings to drive continuous improvement - Ensure alignment with evolving business goals - Perform productivity gaps analysis for business process re-engineering			
	LEVEL 5 - Establish high-level process optimization frameworks - Define strategic process improvement goals - Shape the organization's approach to business process management - Develop sustainability profile for the organization and its operations			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Business process re-engineering

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Business process re-engineering
Skill description	Analyze business processes and workflows within the organization and identification of new approaches to completely redesign business activities or optimize performance, quality and speed of services or processes including exploration of automating and streamlining processes, evaluation of associated costs and benefits of redesigning business processes, as well as identification of potential impact, change management activities and resources required
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Business Analysis
Proficiency description	LEVEL 1 - Learn common process mapping tools such as flowcharts or SIPOC diagrams - Identify inefficiencies in simple processes with guidance - Understand the basics of process redesign - Follow guidelines for optimizing business processes LEVEL 2 - Use tools like Pareto analysis or root cause analysis to diagnose process issues - Create process flow diagrams to communicate proposed changes - Design models for analyzing and re-engineering business processes - Analyze workflows for potential cost savings and performance improvements - Implement enhanced business processes and workflows and assist in developing business process re-engineering plans LEVEL 3 - Implement process automation solutions using tools like RPA or workflow management systems - Analyze process performance data to monitor and refine improvements - Facilitate the redesign of key business processes - Apply tools to automate and streamline workflows - Integrate new approaches to improve performance, quality, and speed, while ensuring alignment with organizational objectives LEVEL 4 - Ensure alignment with strategic goals - Review enterprise-wide process re-engineering initiatives to drive transformation - Integrate advanced analytics tools to measure and enhance process efficiency - Develop governance structures to sustain process improvements. LEVEL 5 - Innovate process optimization frameworks leveraging emerging trends like AI and blockchain - Represent the organization in global forums to share best practices in process excellence - Establish business process re-engineering long-term goals strategies, determining the processes to be re-engineered and significantly redefining process flows for optimizing business processes - Shape the organization's approach to process redesign

Career framework design

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Career framework design					
Skill description	Establish career frameworks to provide pathways to facilitate employees' career development and progression within the organization					
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 
Relevant job families	Learning and development management					
Proficiency description	LEVEL 1 - Identify the elements of a career framework - Understand the fundamentals of career development within an organization - Follow guidelines for contributing to framework design					
	LEVEL 2 - Design career frameworks that align with organizational goals - Analyze employee needs and potential progression paths - Ensure career frameworks are flexible and effective - Develop detailed descriptions for competencies at various proficiency levels					
	LEVEL 3 - Facilitate the development of career frameworks across departments - Apply tools for mapping employee career paths - Integrate career frameworks into organizational development plans					
	LEVEL 4 - Evaluate the effectiveness of career frameworks in driving employee progression - Synthesize data to refine career paths and opportunities - Ensure alignment with long-term talent strategies					
	LEVEL 5 - Establish comprehensive frameworks for employee career development - Define strategic goals for career progression - Shape the organization's approach to talent management and growth - Facilitate the development of organization-wide career frameworks					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Change management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Change management				
Skill description	Overseeing and facilitating the transition of individuals, teams, and organizations to a desired future state. This requires managing the implementation of new processes or technologies while minimizing resistance and maximizing engagement				
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 				
Relevant job families	Ethnographic/scientific research	Business Analysis	Employee experience	Methodology design	Health and safety
	HR Business Partner	Talent management	Vendor/Agency management	Intellectual property services	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize the key components of change management - Follow established procedures for implementing changes - Assist in preparing communication materials for change initiatives - Identify initial resistance points and escalate them to supervisors				
	LEVEL 2 - Design strategies to facilitate change - Develop basic stakeholder analysis to identify key supporters and resisters - Coordinate training sessions to ensure employees are equipped for changes - Ensure smooth implementation of new processes or technologies				
	LEVEL 3 - Implement change readiness assessments to identify gaps before rollout - Develop and oversee feedback loops to monitor ongoing change impacts - Facilitate change initiatives by applying techniques to engage stakeholders - Apply tools for tracking progress and measuring success				
	LEVEL 4 - Integrate change management with enterprise-level strategic initiatives - Evaluate the effectiveness of change management strategies - Ensure alignment with long-term organizational goals				
	LEVEL 5 - Innovate change management methodologies/ strategies using data-driven insights and emerging technologies - Define strategic goals for long-term adaptability - Shape the organization's approach to change, minimizing resistance and enhancing engagement				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Client needs assessment

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Client needs assessment				
Skill description	Conduct comprehensive evaluations of client business objectives, challenges, and opportunities to develop tailored solutions that meet specific client requirements and strategic goals				
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 				
Relevant job families	Litigation	Mediation and arbitrations	Project management	Corporate structuring and M&A	Research and analytics
	Specialized Legal Services and Advisory	Public Policy Management	Legislative research and drafting	Client/account management	Vendor/Agency management
Proficiency description	LEVEL 1 - Identify basic client objectives and challenges - Understand the importance of tailoring solutions to client needs - Follow protocols for client interactions and information gathering				
	LEVEL 2 - Design methodologies for assessing client business needs - Analyze client challenges and opportunities - Ensure alignment of proposed solutions with strategic client goals				
	LEVEL 3 - Facilitate comprehensive evaluations of client needs - Apply tools for gathering and analyzing client data - Integrate findings into custom-tailored strategies				
	LEVEL 4 - Evaluate the impact of solutions on client outcomes - Demonstrate the ability to deeply understand and anticipate client needs, both stated and unstated - Translate client pain points and feedback into data-driven strategies aligned with business objective - Balance client-centric solutions with agency goals to create win-win scenarios				
	LEVEL 5 - Establish frameworks for ongoing client needs assessment - Define long-term client engagement strategies - Shape the organization's approach to meeting complex client requirements				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Company external factors analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Company external factors analysis					
Skill description	Perform research and analysis of the external factor pertaining to companies such as consumers, position in the market, competitors, and political situation.					
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 
Relevant job families	Organizational development					
Proficiency description	LEVEL 1 - Identify key external factors impacting companies - Understand the basics of market and consumer analysis - Follow established procedures for collecting external data					
	LEVEL 2 - Design frameworks for analyzing external factors such as market position, competition, and political landscapes - Analyze data to identify trends and potential impacts - Ensure alignment with organizational strategies					
	LEVEL 3 - Facilitate research into external business factors - Apply advanced tools for market and competitor analysis - Integrate external findings into strategic decision-making processes					
	LEVEL 4 - Evaluate the influence of external factors on company performance - Synthesize insights from market data and competitor behavior - Ensure adaptability of strategies to evolving external conditions					
	LEVEL 5 - Establish comprehensive frameworks for external factor analysis - Define strategic goals for navigating market, consumer, and political changes - Shape the organization's long-term approach to external risk and opportunity management					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Competency assessment

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Competency assessment	
Skill description	Evaluate and monitor the skills and capabilities of individuals or teams to ensure alignment with organizational goals, providing solutions to address gaps and enhance performance	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Talent management	Learning and development management
Proficiency description	LEVEL 1 - Identify core competencies within the organization - Understand the basics of skills evaluation - Follow guidelines for monitoring team performance LEVEL 2 - Design frameworks for assessing competencies - Analyze gaps in skills and capabilities within teams - Ensure solutions are aligned with organizational goals LEVEL 3 - Facilitate competency assessments for teams or individuals - Apply tools for monitoring skills development - Integrate competency data into performance enhancement strategies LEVEL 4 - Evaluate the effectiveness of competency assessment programs - Synthesize data to guide talent development and performance improvements - Ensure alignment with strategic goals for organizational growth LEVEL 5 - Establish comprehensive competency assessment frameworks - Define long-term goals for skills development and organizational alignment - Shape the organization's approach to enhancing workforce capabilities	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Consulting techniques

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Consulting techniques
Skill description	Apply techniques such as discussion groups, one-on-one interviews, and workshops to facilitate clear communication and provide tailored advice to individuals, communities, or governments
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Project management
Proficiency description	LEVEL 1 - Identify basic consulting methods - Understand the importance of communication in consulting engagements - Follow guidelines for facilitating discussions and gathering information LEVEL 2 - Design consulting frameworks tailored to specific client or stakeholder needs - Analyze data gathered through interviews, workshops, and focus groups - Ensure alignment with consulting objectives LEVEL 3 - Facilitate the application of consulting techniques such as workshops, one-on-one interviews, and group discussions - Apply tools to structure consulting engagements - Integrate feedback into tailored advice and solutions LEVEL 4 - Evaluate the effectiveness of consulting techniques in achieving client goals - Synthesize client feedback and data to refine consulting approaches - Ensure adaptability to different consulting scenarios LEVEL 5 - Establish advanced consulting techniques for diverse client needs - Define strategic approaches for applying consulting methods across industries - Shape the organization's consulting practice for long-term success

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Content personalization

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Content personalization
Skill description	Personalize content, such as website content, marketing campaigns, and product recommendations, to cater to the specific interests and preferences of individual customers, enhancing engagement and conversion rates
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Content creation
Proficiency description	LEVEL 1 - Identify the basic methods of personalizing content - Understand the importance of targeted content for customer engagement - Follow guidelines for creating personalized marketing materials LEVEL 2 - Design strategies for personalizing content across platforms - Analyze customer preferences and data to refine personalization efforts - Ensure content aligns with brand and marketing objectives LEVEL 3 - Facilitate the personalization of content for different audience segments - Apply tools for tailoring product recommendations, campaigns, and website content - Integrate personalization strategies into overall marketing plans LEVEL 4 - Evaluate the effectiveness of content personalization efforts - Synthesize customer engagement data to improve targeting and customization - Ensure alignment with evolving marketing goals LEVEL 5 - Establish comprehensive frameworks for content personalization across digital and traditional channels - Define long-term strategies for enhancing customer engagement through targeted content - Shape the organization's approach to personalization for sustained business growth

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Content review and optimization

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Content review and optimization			
Skill description	Articulate, proofread and conduct readability tests on key messages written using appropriate content ideas and writing styles			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Legislative research and drafting	Marketing and communication	Product marketing	Public Policy Management
Proficiency description	LEVEL 1 - Identify key content elements that require review - Understand the importance of proofreading and readability in content creation - Follow guidelines for reviewing and testing content LEVEL 2 - Design frameworks for content review and optimization - Analyze readability and messaging for alignment with marketing or legal objectives - Ensure content adheres to organizational standards LEVEL 3 - Facilitate the review and optimization of key content elements - Apply tools to test readability and messaging effectiveness - Integrate findings into content revision strategies LEVEL 4 - Synthesize feedback from content performance data to refine messaging - Ensure alignment with long-term communication strategies LEVEL 5 - Define strategic goals for enhancing content clarity and effectiveness - Add skills related to developing storyline for effective illustration of business challenges and/ or opportunities			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Contract and vendor management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 							
Skill name	Contract and vendor management							
Skill description	Oversee the creation, execution, and analysis of contracts to maximize financial and operational performance while minimizing risk, ensuring effective vendor relationships and compliance							
Sub-sector	 Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development							Human resources 
Relevant job families	Specialized legal services and advisory	Product management and innovation	Research and analytics	Vendor/Agency management	Marketing and communication	Methodology design	Intellectual property services	Health and safety
Proficiency description	LEVEL 1 - Support the drafting of contracts by researching industry norms while coordinating the documentation and storage of digital and physical records, filing and archival of physical contracts - Identify the basic components of contracts and vendor relationships - Understand the importance of contract execution and compliance - Follow guidelines for managing vendor agreements							
	LEVEL 2 - Prepare drafts of contracts and agreements, and resolve minor contractual issues at an operational level - Analyze vendor performance and contract terms to ensure alignment with business goals							
	LEVEL 3 - Facilitate the execution and analysis of contracts - Apply tools for tracking vendor performance and compliance - Integrate contract findings into operational improvements and risk mitigation strategies - Ensure contracts minimize risk and maximize operational performance							
	LEVEL 4 - Evaluate the effectiveness of vendor relationships and contract outcomes - Synthesize contract performance data to drive strategic improvements - Ensure adaptability to evolving business needs							
	LEVEL 5 - Establish comprehensive frameworks for contract and vendor management - Define strategic goals for optimizing vendor relationships and contract execution - Shape the organization's approach to mitigating risks and maximizing vendor performance - Drive establishment of relationships with cast, crew, vendors and clients							

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Copyright protection

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Copyright protection	
Skill description	Apply knowledge of copyright law to safeguard intellectual property, ensuring the organization's compliance and protection of its creative assets	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Legislative research and drafting	Intellectual property services
Proficiency description	LEVEL 1 - Identify basic copyright laws and intellectual property rights - Understand the importance of safeguarding intellectual property - Follow guidelines for applying copyright protection to organizational assets LEVEL 2 - Design frameworks for copyright protection across departments - Analyze intellectual property risks and ensure compliance with copyright laws - Ensure protection strategies align with organizational objectives LEVEL 3 - Facilitate the application of copyright protection strategies - Apply tools to safeguard intellectual property assets - Integrate copyright protection into business operations and risk management plans LEVEL 4 - Evaluate the effectiveness of copyright protection strategies - Synthesize intellectual property data to guide organizational compliance - Ensure alignment with long-term intellectual property protection goals - Analyze how copyright law drives the organization's copyright strategies and objectives and assess potential courses of action LEVEL 5 - Assess global copyright issues regionally and internationally and determine next steps for resolving identified issues - Establish comprehensive frameworks for safeguarding intellectual property and copyright compliance - Define strategic goals for protecting organizational creative assets - Shape the organization's approach to copyright protection and intellectual property risk management	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Corporate and business law application

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Corporate and business law application		
Skill description	Identify and apply business laws and regulations within organization and respond to legal and regulatory changes to ensure compliance		
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 		
Relevant job families	Regulatory compliance reporting	Specialized legal services and advisory	Tax planning and operations
Proficiency description	LEVEL 1 - Recognize and apply relevant business laws and regulations - Follow standard compliance procedures for legal changes LEVEL 2 - Analyze, interpret and articulate the latest global and regulatory developments relevant to organizational dealings - Analyze the impact of new regulations on operations - Design processes to ensure legal compliance - Respond proactively to regulatory updates LEVEL 3 - Facilitate the integration of legal requirements into business processes - Monitor legal changes and implement necessary adjustments - Support teams in complying with regulations LEVEL 4 - Synthesize legal insights into strategic planning - Ensure compliance with complex regulations - Evaluate the impact of legal changes on long-term operations - Evaluate and apply relevant laws and regulations to support decision-making and organizational dealings LEVEL 5 - Define organizational approaches to regulatory compliance - Set direction for legal risk management and ensure adaptability to evolving legal landscapes - Define regulatory and legal framework relevant to organizational dealings and identify their impact on the organization's risks and operations		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Customer behavior analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Customer behavior analysis				
Skill description	Analyze consumer behavior patterns and preferences to identify business opportunities and risks, enabling data-driven decision-making and strategy development				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development  Human resources 
Relevant job families	Marketing planning and management	Ethnographic/scientific research	Research and analytics	Vendor/Agency management	Client/account management
Proficiency description	LEVEL 1 - Identify and collect data on customer preferences - Recognize basic patterns in consumer behavior				
	LEVEL 2 - Analyze consumer behavior data to identify trends - Evaluate opportunities for product and service adjustments based on customer insights				
	LEVEL 3 - Facilitate in-depth studies of consumer preferences - Implement strategies that align with identified behavior trends - Optimize marketing efforts based on behavior analysis				
	LEVEL 4 - Synthesize behavior analytics to guide strategic decisions - Evaluate the long-term impact of consumer trends on business goals - Integrate behavior data with other market research				
	LEVEL 5 - Shape the organization's strategy by defining customer behavior-driven objectives - Establish advanced behavior analytics frameworks to guide business direction				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Customer journey mapping

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Customer journey mapping
Skill description	Create visual representations of the customer journey to identify key touchpoints and pain points, ensuring a comprehensive understanding of the user experience to optimize interactions and improve satisfaction
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Graphics design
Proficiency description	LEVEL 1 - Identify key stages of the customer journey (awareness, consideration, purchase, retention) - Map existing customer interactions under supervision - Understand basic tools for journey mapping (e.g., flowcharts, personas) - Assist in gathering customer feedback for journey analysis LEVEL 2 - Analyze customer pain points and suggest improvements - Create customer personas to understand target audiences better - Use tools like customer journey mapping software to visualize processes - Present findings and recommendations to teams LEVEL 3 - Design end-to-end customer journeys aligned with business objectives - Develop actionable insights based on customer behavior data - Collaborate with cross-functional teams to implement improvements - Measure the impact of journey enhancements on customer satisfaction LEVEL 4 - Oversee the execution of multi-channel customer journey strategies - Ensure alignment of customer journeys with brand and business values - Leverage advanced analytics to personalize customer experiences - Foster a customer-centric culture within the organization LEVEL 5 - Innovate in customer journey mapping techniques and tools - Influence industry standards for customer experience design

Technical skill charter

Customer Relationship Management (CRM) strategy and systems

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Customer Relationship Management (CRM) strategy and systems					
Skill description	Develop and implement strategies to manage customer interactions throughout the customer lifecycle, driving retention and sales growth. Utilize CRM software and tools to analyze customer data, enabling personalized interactions and tailored experiences that enhance customer satisfaction and loyalty					
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 
Relevant job families	Branding management	Product marketing	Marketing planning and management	Bookkeeping	Marketing and communication	Client/account management
Proficiency description	LEVEL 1 - Recognize the role of CRM systems in customer interaction - Apply CRM software to track basic customer data					
	LEVEL 2 - Design and implement CRM strategies to enhance customer interactions - Analyze customer data for personalization opportunities - Use CRM tools for customer retention					
	LEVEL 3 - Facilitate the use of CRM systems to manage complex customer interactions - Implement advanced customer segmentation and loyalty programs - Utilize CRM insights for data-driven decision-making					
	LEVEL 4 - Evaluate and optimize CRM strategies based on customer feedback and analytics - Integrate CRM into business planning - Enhance overall customer satisfaction through tailored approaches					
	LEVEL 5 - Establish comprehensive CRM frameworks to guide customer lifecycle management - Define long-term CRM strategy to ensure consistent growth and retention					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Cyber and data breach incident management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Cyber and data breach incident management	
Skill description	Detect and report cyber and data-related incidents, identify affected systems and user groups, trigger alerts and announcements to relevant stakeholders and efficient resolution of the situation	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Data collection and management	Regulatory compliance reporting
Proficiency description	LEVEL 1 - Recognize potential cyber incidents and follow basic protocols - Provide real-time incident and status reporting, and identify affected systems and user groups LEVEL 2 - Troubleshoot incidents, escalate alerts to relevant stakeholder, and analyze root causes and implications of incidents - Analyze cyber breaches to identify affected systems and users - Design incident response plans - Ensure timely communication during incidents LEVEL 3 - Facilitate breach resolution by coordinating teams - Monitor the effectiveness of incident management processes - Implement post-incident reviews to improve security measures - Develop incident management procedures and synthesize incident-related analyzes to distil key insights, resolve incidents and establish mitigating and preventive solutions LEVEL 4 - Evaluate incident management strategies and optimize processes to minimize future risks - Ensure alignment of breach responses with organizational risk appetite - Formulate incident response strategies and direct teams in the remediation, resolution, communication and post-mortem of large-scale, unpredictable cyber and data incidents LEVEL 5 - Establish strategic approaches to data breach management - Shape policies to minimize breach impact and ensure comprehensive risk mitigation - Drive cross-collaboration efforts to co-develop strategies to manage cyber and data incidents on an industry, national or international scale	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Cyber security threat and risk management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Cyber security threat and risk management		
Skill description	Identify, assess, and document cyber security insider threats while conducting comprehensive threat assessments and implementing prevention strategies. Support organizational cyber security by reviewing data protection policies, contributing to cyber security audits, and managing risks through stakeholder consultation and staff training to enhance overall security posture		
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 		
Relevant job families	Product management and innovation	Risk management	Regulatory compliance reporting
Proficiency description	LEVEL 1 - Recognize potential cyber threats - Apply basic security measures to mitigate risks LEVEL 2 - Analyze cybersecurity risks and design prevention strategies - Support risk assessments by gathering relevant data LEVEL 3 - Facilitate threat management by implementing advanced risk mitigation tools - Ensure continuous monitoring of threats and vulnerabilities - Contribute to the development and implementation of cyber security policies LEVEL 4 - Evaluate the effectiveness of cybersecurity measures and synthesize risk management strategies - Align organizational policies with emerging cyber threats LEVEL 5 - Set organizational cybersecurity goals - Define long-term security strategies to ensure comprehensive threat management		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Cybersecurity awareness in accounting

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Cybersecurity awareness in accounting
Skill description	Identify and mitigate cybersecurity risks in financial systems and accounting processes. Ensure sensitive financial data is protected through secure practices and technologies. Promote awareness of potential threats and best practices in the organization
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Risk management
Proficiency description	LEVEL 1 - Recognize common cybersecurity risks in financial processes - Apply basic protective measures LEVEL 2 - Analyze cybersecurity threats in financial operations - Design systems to protect sensitive financial data - Ensure compliance with security protocols - Follow basic procedures for reporting suspicious activities LEVEL 3 - Facilitate training and awareness programs on accounting-related cybersecurity risks - Implement advanced security measures in accounting processes LEVEL 4 - Evaluate the effectiveness of cybersecurity measures in financial operations - Ensure alignment with industry best practices and evolving threats - Perform regular audits to ensure the integrity and security of financial data LEVEL 5 - Establish organizational cybersecurity standards in accounting - Shape strategic initiatives to ensure long-term data protection in financial systems

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data analytics and system optimization

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Data analytics and system optimization					
Skill description	Extract meaningful insights from data to drive informed decision-making, leveraging advanced statistical techniques, algorithms, and computational models. Design and integrate data analytics systems to identify bottlenecks, optimize processes, and improve overall organizational performance					
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 
Relevant job families	Data collection and management	Design engineering	Ethnographic/scientific research	Statistical Analysis and Interpretation	Product marketing	Product management and innovation
	Research and analytics	Tax planning and operations	Methodology design	Vendor/Agency management	Client/account management	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize key data points and apply basic data analysis techniques - Extract insights from structured datasets					
	LEVEL 2 - Analyze data using advanced statistical methods - Design systems to optimize data processing - Apply insights to improve operational efficiency					
	LEVEL 3 - Facilitate the use of data analytics across teams - Implement systems for continuous process optimization based on data-driven insights - Integrate analytics with decision-making processes					
	LEVEL 4 - Evaluate data analytics frameworks and optimize them for long-term business objectives - Ensure the organization's analytical capabilities align with strategic goals					
	LEVEL 5 - Establish advanced data analytics frameworks that drive organizational transformation - Set strategic direction for data-driven decision-making and continuous process optimization - Incorporate elements of data governance and ethics to ensure a responsible approach to data analytics					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data backup and recovery

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Data backup and recovery			
Skill description	Understanding of data backup and recovery procedures to ensure the secure and timely backup of critical data and information			
Sub-sector	Legal 	 Accounting and auditing 	Management consulting services 	 Marketing advertising and market research   Research and development  Human resources 
Relevant job families	Data collection and management	Tax planning and operations	Client/account management	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize the importance of regular data backups - Apply standard backup procedures			
	LEVEL 2 - Analyze backup requirements and ensure data integrity - Design recovery plans to minimize data loss risks			
	LEVEL 3 - Facilitate data recovery processes and monitor the effectiveness of backup solutions - Ensure business continuity through proactive recovery management			
	LEVEL 4 - Evaluate and optimize backup and recovery strategies - Synthesize backup data with long-term disaster recovery plans			
	LEVEL 5 - Define organizational standards for data protection and recovery - Set long-term goals to ensure secure and reliable data management			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data ethics

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Data ethics			
Skill description	Apply legal and ethical principles in the collection, use, storage, and disposal of data to ensure compliance and protect privacy and integrity			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Data collection and management	Regulatory compliance reporting	Vendor/Agency management	Client/account management
Proficiency description	LEVEL 1 - Follow basic legal and ethical standards for data usage - Recognize the importance of data privacy and integrity LEVEL 2 - Advise teams on proper data handling practices - Analyze data collection and usage practices to ensure alignment with legal and ethical standards LEVEL 3 - Monitor data integrity and privacy across systems - Facilitate the development of ethical data usage policies - Implement training programs to enhance ethical awareness LEVEL 4 - Integrate ethical considerations into strategic data decisions - Evaluate organizational data ethics policies for consistency and effectiveness LEVEL 5 - Define long-term approaches to maintaining integrity and compliance with evolving legal standards - Shape the organizational strategy for ethical data use			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data governance

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Data governance				
Skill description	Develop, implement, and enforce guidelines, laws, and regulations for handling data throughout its lifecycle, providing advice on proper data management and addressing data breaches				
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 				
Relevant job families	Data collection and management	Regulatory compliance reporting	Vendor/Agency management	Methodology design	Client/account management
Proficiency description	LEVEL 1 - Apply standard procedures for data handling - Recognize basic principles of data governance LEVEL 2 - Implement processes for data quality and integrity - Analyze data governance frameworks to ensure compliance with regulations LEVEL 3 - Ensure adherence to guidelines - Facilitate data governance across departments by integrating best practices with organizational operations LEVEL 4 - Synthesize legal and operational requirements into governance policies - Evaluate and optimize data governance strategies LEVEL 5 - Shape the organization's long-term approach to regulatory compliance and data integrity - Establish comprehensive data governance frameworks				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data migration

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 								
Skill name	Data migration								
Skill description	Plan and execute the migration of data between different storage types or file formats, ensuring data integrity, security, and minimal disruption to operations								
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 								
Relevant job families	Data collection and management	Regulatory compliance reporting	Accounting Analysis and Reporting	Accounting Operations	Audit Operations	Book-keeping	Vendor/ Agency management	Tax planning and operations	Client/ account management
Proficiency description	LEVEL 1 - Apply basic procedures to transfer data between systems - Recognize the need for secure data migration LEVEL 2 - Design migration plans for smooth transitions - Analyze data migration requirements to ensure integrity and security LEVEL 3 - Implement solutions to protect data during migration - Facilitate data migration processes, ensuring minimal disruption to operations LEVEL 4 - Ensure compliance with security and privacy standards during migrations - Evaluate and optimize data migration strategies LEVEL 5 - Establish best practices for ensuring seamless transitions while safeguarding data integrity - Define the organization's approach to large-scale data migration								

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data mining

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 								
Skill name	Data mining								
Skill description	Leverage artificial intelligence and data mining techniques to extract valuable insights from large datasets, enabling automated visualizations and faster solutions. Establish and apply data modeling techniques to support narrative and predictive analytics, identifying trends and patterns for simulation and forecasting								
Sub-sector	Legal 	 Accounting and auditing 	 Management consulting services 	 Marketing advertising and market research 	 Research and development 	Human resources 			
Relevant job families	Data collection and management	Regulatory compliance reporting	Accounting Analysis and Reporting	Accounting Operations	Book-keeping	Tax planning and operations	Methodology design	Client/account management	Quality assurance and control
Proficiency description	LEVEL 1 - Apply basic data mining techniques - Recognize the value of data mining for identifying trends LEVEL 2 - Implement predictive models for data-driven decisions - Analyze datasets using advanced mining techniques to extract patterns and insights LEVEL 3 - Automate data visualization to support decision-making - Facilitate the integration of data mining into business processes - Implement data models for narrative and forecasting LEVEL 4 - Synthesize data insights for long-term planning and forecasting - Evaluate and optimize data mining strategies to align with business goals LEVEL 5 - Define strategic initiatives based on predictive analytics and data-driven insights - Shape the organizational approach to advanced data mining techniques								

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data privacy

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 						
Skill name	Data privacy						
Skill description	Safeguard sensitive information by adhering to data privacy laws and organizational policies, ensuring secure collection, processing, and storage of data. Protect privacy rights and prevent unauthorized access to maintain compliance and trust						
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development 						Human resources 
Relevant job families	Specialized Legal Services and Advisory	Regulatory compliance reporting	Data collection and management	Vendor/ Agency management	Tax planning and operations	Client/ account management	Quality assurance and control
Proficiency description	LEVEL 1 - Apply standard practices to protect information - Recognize data privacy regulations						
	LEVEL 2 - Implement policies to ensure compliance with data privacy requirements - Analyze data privacy requirements and advise teams on secure data handling practices						
	LEVEL 3 - Monitor compliance with regulations - Facilitate data privacy management by implementing solutions to protect sensitive data and prevent unauthorized access						
	LEVEL 4 - Synthesize legal and regulatory requirements into long-term privacy strategies - Evaluate and optimize data privacy frameworks						
	LEVEL 5 - Establish comprehensive data privacy policies to protect organizational and customer data - Lead incident response for handling data breaches						

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Data protection management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Data protection management			
Skill description	Develop and implement a data protection management program to ensure compliance with personal data protection regulations and laws, safeguarding sensitive information			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Data collection and management	Regulatory compliance reporting	Vendor/Agency management	Client/account management
Proficiency description	LEVEL 1 - Apply basic protection measures - Recognize the need for secure data handling and storage			
	LEVEL 2 - Implement safeguards to ensure compliance with laws and regulations - Analyze data protection risks			
	LEVEL 3 - Monitor data security and address vulnerabilities - Facilitate data protection management programs by ensuring regulatory compliance			
	LEVEL 4 - Synthesize protection measures with long-term organizational goals - Evaluate data protection programs for effectiveness			
	LEVEL 5 - Establish comprehensive frameworks for ensuring data security and regulatory compliance - Define the organization's data protection strategy			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Demand and supply analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Demand and supply analysis	
Skill description	Analyze and assess market dynamics to uncover demand and supply outlook of products to enable better positioning and identification of opportunities and suitability of offerings	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Business Analysis	Research and analytics
Proficiency description	LEVEL 1 - Collect data on demand and supply factors - Recognize market dynamics and apply basic analysis techniques	
	LEVEL 2 - Implement strategies to respond to market dynamics - Analyze market trends to assess demand and supply outlook	
	LEVEL 3 - Identify opportunities and risks based on comprehensive analysis - Facilitate demand and supply assessments by integrating market analytics with business operations - Carry out demand and supply analysis and analyze market characteristics of products and solutions to assess its demand supply outlook	
	LEVEL 4 - Assess the desirability and practicality of ongoing market, product and solutions development and undertake activities where appropriate based on identified demand and supply opportunities - Synthesize analysis insights into business strategy to improve market positioning - Evaluate and optimize demand and supply strategies	
	LEVEL 5 - Define long-term strategies to align with market trends and opportunities - Shape the organization's approach to demand and supply management	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Digital content creation

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Digital content creation
Skill description	Design and layout digital pages by selecting appropriate sizes, styles, and inputting text and graphics into computer systems, ensuring visually appealing and effective content
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Marketing and communication
Proficiency description	LEVEL 1 - Apply standard tools and techniques to create content - Recognize the basics of digital design LEVEL 2 - Design digital content by selecting appropriate layouts, styles, and graphics - Ensure alignment with brand identity LEVEL 3 - Coordinate teams and ensure quality control - Facilitate the creation of digital content by implementing content strategies to maximize engagement LEVEL 4 - Synthesize audience insights into content creation processes for long-term success - Evaluate and optimize digital content strategies LEVEL 5 - Shape the organization's content strategy to align with business goals and audience preferences - Establish comprehensive digital content creation frameworks

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Digital marketing and communication

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Digital marketing and communication				
Skill description	Develop, execute and evaluate digital marketing strategies and campaigns to promote online presence and deliver value proposition through the use of various digital marketing channels and platforms				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services  Marketing advertising and market research 		Research and development  Human resources 
Relevant job families	Digital marketing		Marketing and communication		Marketing planning and management
Proficiency description	LEVEL 1 • Apply standard practices to promote products or services online • Recognize basic digital marketing channels				
	LEVEL 2 • Implement strategies for targeted audience engagement using multiple digital platforms • Analyze digital marketing data to optimize campaigns				
	LEVEL 3 • Monitor and report on campaign performance • Facilitate the development and execution of digital marketing campaigns across various channels				
	LEVEL 4 • Synthesize digital marketing data to inform business strategies • Evaluate digital marketing strategies for impact and ROI				
	LEVEL 5 • Shape the organization's approach to digital communication and engagement • Establish long-term digital marketing strategies to drive brand presence				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Environmental awareness

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Environmental awareness			
Skill description	Identify environmental issues and sustainability principles to propose eco-friendly alternatives, ensuring alignment with the organization's sustainability goals			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Legislative research and drafting	Product management and innovation	Regulatory compliance reporting	Project management
Proficiency description	LEVEL 1 - Recognize basic environmental principles - Apply eco-friendly alternatives in daily work processes			
	LEVEL 2 - Implement sustainability-focused strategies - Analyze environmental issues and propose compliance solutions			
	LEVEL 3 - Facilitate environmental initiatives across departments - Develop and monitor sustainable practices in line with legal and organizational goals			
	LEVEL 4 - Synthesize environmental policies into organizational strategies - Evaluate and optimize environmental impact practices			
	LEVEL 5 - Shape the organization's sustainability goals - Define long-term environmental strategies and compliance measures

Sub-sector	Legal 	Accounting and auditing 	Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Business Analysis	Product management and innovation	Client/account management
Proficiency description	LEVEL 1 - Recognize key factors in market assessment - Assist in gathering market data - Understand basic market segmentation LEVEL 2 - Analyze the viability of a market, territory or region by deploying relevant and appropriate market assessment tools and research projects - Support the development of adaptation strategies - Contribute to the selection of targeting tactics LEVEL 3 - Facilitate comprehensive market evaluations - Collaborate with teams to develop positioning strategies - Assess the effectiveness of market adaptation efforts - Conduct qualitative and quantitative research to develop a deeper understanding of market trends LEVEL 4 - Synthesize market insights to inform product strategies - Evaluate the impact of market changes on business objectives LEVEL 5 - Set strategic direction for market evaluation - Establish frameworks for assessing market viability - Drive strategies to evaluate the potential of current and new markets for the organization		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Market research and analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 									
Skill name	Market research and analysis									
Skill description	Develop and manage market analysis frameworks to guide the examination of trends, competitive factors, and economic changes, identifying business insights, forecasting needs, and uncovering new opportunities									
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 									
Relevant job families	Business Analysis	Digital marketing	Branding management	Marketing and communication	Marketing planning and management	Product marketing	Research and analytics	Vendor/Agency management	Intellectual property services	Health and safety
Proficiency description	LEVEL 1 - Understand basic research methodologies - Assist in data collection and analysis - Recognize the importance of market insights LEVEL 2 - Analyze competitive factors and trends - Support the development of market analysis frameworks - Contribute to identifying new business opportunities LEVEL 3 - Facilitate in-depth market research initiatives - Collaborate with teams to forecast market needs - Evaluate the effectiveness of research methodologies - Plan market, competitor and customer research activities and analyze trends and dynamics through information gathered LEVEL 4 - Direct market research and analytics activities and processes to optimize the quantity and quality of responses and business insights - Assess the impact of economic changes on the organization LEVEL 5 - Drive strategic direction for market research - Establish best practices for market analysis - Set vision for uncovering new business opportunities - Define critical business questions, establish new ways to optimize digital data and present insights from marketing and digital research to senior management									

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Market risk management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Market risk management
Skill description	Identify, monitor and manage risks arising from movement in market prices such as foreign exchange rates, interest rates, credit spreads, equity and commodity prices, cash flow and liquidity positions
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Regulatory compliance reporting
Proficiency description	LEVEL 1 - Identify basic market risks - Assist in monitoring market conditions - Understand the importance of risk management LEVEL 2 - Analyze market movements and their implications - Support the development of risk management strategies - Contribute to compliance reporting LEVEL 3 - Facilitate the identification and management of market risks - Collaborate with stakeholders to mitigate risks - Evaluate the effectiveness of risk management frameworks LEVEL 4 - Monitor and analyze market risk drivers, conduct market risk assessments across business function, implement risk controls and execute risk response activities - Develop comprehensive strategies to monitor market fluctuations - Assess organizational exposure to market risks LEVEL 5 - Develop scope of market risk management framework within functional tracks, analyzing market risk drivers, developing risk response activities and providing market risk management advisory - Drive initiatives to enhance risk mitigation strategies - Establish market risk management strategies in line with the organization's overall risk management framework

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Marketing opportunities assessment

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Marketing opportunities assessment	
Skill description	Evaluate market data, analyze emerging trends, and assess the viability of new product development to capitalize on marketing opportunities, ensuring alignment with organizational strategies and applying best practices	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Product management and innovation	Marketing and communication
Proficiency description	LEVEL 1 - Recognize emerging trends in the market - Assist in gathering market data - Understand basic principles of product development LEVEL 2 - Analyze market data to evaluate potential opportunities - Support the assessment of new product viability - Contribute to alignment with organizational strategies LEVEL 3 - Collaborate with teams to evaluate marketing opportunities - Facilitate assessments of emerging trends - Ensure alignment with best practices in product development LEVEL 4 - Lead comprehensive assessments of marketing opportunities - Develop strategies to capitalize on emerging trends - Evaluate the effectiveness of product initiatives LEVEL 5 - Drive strategic direction for marketing opportunities - Establish frameworks for evaluating market data - Set vision for innovative product development strategies	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Marketing strategy

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Marketing strategy		
Skill description	Develop, execute, and evaluate marketing strategies and campaigns to enhance brand presence and deliver value propositions across various marketing channels, ensuring alignment with organizational strategies and applying best practices		
Sub-sector	Legal 	Accounting and auditing 	Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Marketing planning and management	Product management and innovation	Marketing and communication
Proficiency description	LEVEL 1 - Assist in the implementation of marketing initiatives - Recognize the importance of strategic marketing planning - Understand basic marketing principles LEVEL 2 - Analyze marketing data to inform strategy - Support the development of marketing plans - Contribute to the evaluation of marketing initiatives - Identify critical customer segments, market gaps and competitors to support the development of a marketing strategy, and lead implementation of marketing efforts LEVEL 3 - Collaborate with teams to execute marketing strategies - Facilitate the assessment of marketing campaigns - Evaluate their effectiveness in achieving objectives LEVEL 4 - Review the development and implementation of comprehensive marketing strategies - Optimize marketing efforts based on feedback - Ensure alignment with organizational goals LEVEL 5 - Set strategic direction for marketing initiatives - Drive innovation in marketing strategy development - Develop a strategy to grow market demand for key products and services, considering critical customers, market potential assessment and impact of emerging trends		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Operational risk management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Operational risk management			
Skill description	Develop and implement operational risk management strategies and structure to identify, measure, analyze, control, monitor and report on operational risks			
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 			
Relevant job families	Corporate structuring and M&A	Health and safety	Regulatory compliance reporting	Risk management
Proficiency description	LEVEL 1 - Recognize the importance of operational risk - Understand basic concepts of the operational risk framework - Follow organization's operational risk processes to identify potential risks LEVEL 2 - Analyze operational risk drivers, monitor operational risk indicators and deploy risk response activities to support operational risk management - Support the development of risk management strategies - Contribute to compliance reporting and ensure adherence to regulatory requirements LEVEL 3 - Facilitate the identification and assessment of operational risks - Collaborate with stakeholders to develop mitigation strategies - Evaluate the effectiveness of risk management practices - Develop risk control measures to mitigate potential operational risks LEVEL 4 - Review comprehensive operational risk management initiatives - Develop strategies for monitoring and reporting risks - Assess organizational resilience to operational risks LEVEL 5 - Drive strategic direction for operational risk management - Establish organization's operational risk management standards, policies and practices - Set vision for organizational resilience			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Organizational design

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Organizational design
Skill description	Develop and facilitate the implementation of organizational design to ensure its effectiveness and alignment with stakeholders' priorities
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Organizational development
Proficiency description	LEVEL 1 - Recognize key elements of organizational design - Assist in documenting organizational design processes - Understand basic organizational structures LEVEL 2 - Analyze organizational structures to identify areas for improvement - Implement the organizational design changes - Contribute to stakeholder engagement LEVEL 3 - Facilitate the development and implementation of effective organizational designs - Collaborate with teams to align structures with business goals - Conduct evaluation and analysis of the outcomes of organizational design LEVEL 4 - Evaluate initiatives to enhance organizational design - Synthesize stakeholder feedback to inform design decisions - Assess alignment with organizational priorities LEVEL 5 - Drive the implementation of organizational design - Establish best practices for effective design implementation - Align organizational design with business needs and priorities

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Organizational planning and target setting

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Organizational planning and target setting				
Skill description	Identify and prioritize strategic needs of the organization to determine key performance indicators to achieve established goals				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development  Human resources 
Relevant job families	Business Analysis				
Proficiency description	LEVEL 1 - Identify basic organizational needs - Assist in gathering data for planning - Understand key performance indicators (KPIs)				
	LEVEL 2 - Analyze strategic needs to prioritize goals - Support the development of performance indicators - Contribute to target setting for departmental objectives				
	LEVEL 3 - Facilitate organizational planning processes - Collaborate with stakeholders to align targets with strategic objectives - Evaluate the effectiveness of target-setting efforts				
	LEVEL 4 - Lead comprehensive organizational planning initiatives - Develop methodologies for effective target setting - Assess organizational performance against established KPIs				
	LEVEL 5 - Drive strategic direction for organizational planning - Establish frameworks for setting targets - Set vision for achieving organizational goals				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Organisational strategy and policy realisation

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Organisational strategy and policy realisation		
Skill description	Make management decisions to establish, review, and refine strategic organizational objectives and policies by collating and analyzing relevant business information, ensuring alignment with best practices and organizational strategies		
Sub-sector	Legal 	Accounting and auditing 	Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Business Analysis	Organizational development	Intellectual property services
Proficiency description	LEVEL 1 - Recognize the importance of strategic alignment - Assist in gathering business information - Understand basic organizational policies		
	LEVEL 2 - Analyze relevant business information to inform decisions - Review and support the improvement of policies - Contribute to ensuring alignment with best practices - Contribute to strategic and operational plans		
	LEVEL 3 - Facilitate the development and implementation of strategic objectives - Collaborate with teams to ensure policy alignment - Evaluate the effectiveness of organizational strategies - Support management decision-making with information processing		
	LEVEL 4 - Evaluate initiatives to establish and refine organizational strategies - Synthesize business insights to inform policy decisions - Assess organizational alignment with goals and objectives		
	LEVEL 5 - Drive strategic direction for policy realization - Establish frameworks for developing organizational strategies - Develop organizational strategies and policies		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Organizational strategic planning

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Organizational strategic planning		
Skill description	Lead the development of high-level strategic plans that serve the vision and mission of an organization. It addresses analyzing the environment, identifying risks and opportunities, planning staffing requirements, succession planning, and establishing and monitoring financial and non-financial performance indicators		
Sub-sector	 Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources		
Relevant job families	Business Analysis	Organizational development	Vendor/Agency management
Proficiency description	LEVEL 1 - Assist in gathering data for planning - Recognize key performance indicators - Assist in conducting SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis for small projects/ departments - Familiarize with organizational vision, mission, and values to align tasks with strategic objectives LEVEL 2 - Analyze internal and external factors affecting strategy - Support the development of staffing and succession plans - Collaborate on creating strategic objectives using SMART (Specific, Measurable, Achievable, Relevant, Time-bound) criteria - Contribute to environmental scanning, including PESTLE (Political, Economic, Social, Technological, Legal, Environmental) analysis, to identify external influences LEVEL 3 - Facilitate the development of high-level strategic plans - Collaborate with stakeholders to align strategies with vision and mission - Evaluate the impact of strategic initiatives - Design strategic initiatives with clear milestones and performance indicators for medium-complexity projects - Utilize scenario planning techniques to evaluate potential outcomes and adjust strategies accordingly LEVEL 4 - Lead comprehensive strategic planning processes - Develop methodologies for analyzing risks and opportunities - Assess organizational performance against strategic goals - Demonstrate the ability to conduct workshops with senior leaders to refine strategic direction and ensure buy-in LEVEL 5 - Develop enterprise-wide strategic frameworks that incorporate innovation and agility - Leverage emerging technologies, such as AI and advanced analytics, to forecast trends and inform strategic decisions - Drive strategic direction for organizational planning - Set vision for aligning strategy with organizational objectives		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Policy development

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 						
Skill name	Policy development						
Skill description	Apply knowledge of best practices in DEI (Diversity, Equity, and Inclusion) policy development and implementation to ensure organizational policies align with DEI goals, fostering an inclusive and equitable workplace, while ensuring alignment with organizational strategies						
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 	
Relevant job families	Employee experience	Onboarding	Organizational development	Human Resource Information Systems (HRIS)	HR Business Partner	Vendor/ Agency management	Client/ account management
Proficiency description	LEVEL 1 - Recognize the importance of DEI in policy-making - Assist in documenting policies - Understand basic principles of policy development LEVEL 2 - Analyze existing policies for alignment with DEI goals - Support the implementation of new policies - Contribute to stakeholder engagement in policy development LEVEL 3 - Facilitate the development of inclusive policies that align with organizational strategies - Collaborate with teams to ensure policies reflect best practices - Evaluate policy effectiveness LEVEL 4 - Lead initiatives for comprehensive policy development - Synthesize stakeholder feedback to inform policy decisions - Assess organizational adherence to DEI objectives LEVEL 5 - Drive strategic direction for policy development - Establish frameworks for creating and implementing policies

Technical skill charter

Process design

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Process design		
Skill description	Develop efficient and effective workflows, systems, and solutions tailored to meet various business needs and goals, ensuring alignment with best practices and organizational strategies		
Sub-sector	Legal 	Accounting and auditing  Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Business Analysis	Tax planning and operations	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize key elements of effective workflows - Assist in documenting business processes - Understand basic principles of process design		
	LEVEL 2 - Analyze business needs to inform process design - Support the development of efficient workflows - Contribute to stakeholder engagement in design processes		
	LEVEL 3 - Facilitate the creation of efficient workflows and systems tailored to business needs - Collaborate with teams to ensure alignment with best practices - Evaluate process outcomes and recommend improvements		
	LEVEL 4 - Lead initiatives for comprehensive process design - Synthesize stakeholder feedback to enhance workflows - Assess the effectiveness of process design in achieving organizational goals		
	LEVEL 5 - Drive strategic direction for process design - Establish best practices for creating efficient systems - Set vision for continuous improvement in business processes		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Process improvement and optimization

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Process improvement and optimization		
Skill description	Implement improvements to current processes to maximize efficiency and effectiveness of operations by applying best practices and ensuring alignment with organizational strategies		
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 		
Relevant job families	Ethnographic/scientific research	Methodology design	Organizational development
Proficiency description	LEVEL 1 - Recognize the importance of process efficiency - Assist in documenting current processes - Understand basic principles of process improvement LEVEL 2 - Analyze existing processes to identify areas for improvement - Develop and ensure to implement the process improvements - Contribute to ensuring alignment with best practices LEVEL 3 - Facilitate the development and implementation of process improvements - Collaborate with teams to maximize operational efficiency - Identify and Implement the adoption of process improvement and optimization methods LEVEL 4 - Review comprehensive initiatives for process optimization - Develop methodologies for assessing process effectiveness - Assess organizational outcomes against established benchmarks LEVEL 5 - Devise strategies for the adoption of improvements and optimization of processes - Establish frameworks for continuous optimization - Set vision for achieving operational excellence		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Process mapping and analysis

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Process mapping and analysis					
Skill description	Deep understanding in process mapping and analysis techniques to visualize current workflows, identify bottlenecks, and determine the most suitable processes for automation					
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development 	Human resources 
Relevant job families	Project management	Research planning and strategy	Methodology design	Vendor/Agency management	Tax planning and operations	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize basic elements of process mapping - Assist in documenting workflows - Understand common mapping techniques					
	LEVEL 2 - Analyze current workflows to identify inefficiencies - Support the development of process maps - Contribute to visualizing processes for better understanding					
	LEVEL 3 - Facilitate the mapping and analysis of processes to identify bottlenecks - Collaborate with teams to recommend process improvements - Evaluate the effectiveness of mapped processes					
	LEVEL 4 - Lead initiatives for comprehensive process mapping and analysis - Synthesize findings to inform process redesign - Assess alignment with best practices in automation					
	LEVEL 5 - Drive strategic direction for process mapping - Establish frameworks for continuous process improvement - Set vision for optimizing workflows through automation					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Product design and development

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Product design and development	
Skill description	Manage new product design and development from Research and Development (R&D), including initial product design concepts, small batch piloting, market testing and evaluation	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Product management and innovation	Quality assurance and control
Proficiency description	LEVEL 1 - Understand basic principles of product design - Assist in gathering product requirements and research - Recognize key stages of product development LEVEL 2 - Analyze market needs to inform product design - Support the development of initial product concepts - Contribute to small batch piloting and feedback collection - Conduct research on a regular basis to develop and design and the new product LEVEL 3 - Facilitate the management of new product design and development processes - Collaborate with R&D teams to evaluate product prototypes - Assess and analyze market testing outcomes to inform product improvements - Interpret and apply new product development requirements to ensure alignment with business and regulatory standards LEVEL 4 - Review comprehensive product design and development initiatives - Develop methodologies for managing product innovation - Evaluate product success against market criteria - Establish new product development strategies and plans to manage new product design and development LEVEL 5 - Formulate strategic directions for new product design and development to maintain the organizations competitiveness - Establish comprehensive frameworks for continuous product improvement and innovation - Set and lead the vision for aligning product offerings with market needs and trends	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Product testing management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Product testing management		
Skill description	Develop product testing protocols and procedures based on product specifications to test and determine the full characteristics of product profiles		
Sub-sector	Legal 	Accounting and auditing  Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Product management and innovation	Methodology design	Quality assurance and control
Proficiency description	LEVEL 1 - Recognize basic elements of product testing - Assist in documenting product specifications - Apply product testing protocols and procedures to perform product testing LEVEL 2 - Analyze product specifications to inform testing processes - Support the development of testing procedures - Contribute to evaluating test outcomes LEVEL 3 - Facilitate the development and management of product testing protocols - Collaborate with teams to ensure thorough evaluation of product characteristics - Assess testing effectiveness LEVEL 4 - Review initiatives for comprehensive product testing management - Develop methodologies for testing protocol design - Evaluate project outcomes against strategic objectives and ensure alignment with organizational goals LEVEL 5 - Drive strategic direction for product testing - Establish frameworks for continuous improvement in testing processes - Set vision for ensuring product quality through rigorous testing

Research findings communication

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 			
Skill name	Research findings communication			
Skill description	Communicate research findings effectively to the target audiences using communication methods in accordance to established standards in the scientific community			
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Research planning and strategy	Methodology design	Statistical analysis and interpretation	Research and analytics
Proficiency description	LEVEL 1 - Understand basic principles of communicating research findings - Support the preparation of research reports - Recognize the importance of audience targeting LEVEL 2 - Analyze research findings to inform communication strategies - Support the development of clear and concise reports - Contribute to aligning communication with audience needs LEVEL 3 - Facilitate effective communication of research findings to diverse audiences - Collaborate with teams to ensure clarity and impact of messaging - Evaluate the effectiveness of research communication LEVEL 4 - Assess initiatives for disseminating research findings - Develop methodologies for tailoring messages to different audiences - Evaluate the reception of communicated findings LEVEL 5 - Drive strategic direction for research communication - Establish frameworks for ongoing audience engagement - Set vision for enhancing the impact of research messaging			

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Stakeholder engagement and management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 					
Skill name	Stakeholder engagement and management					
Skill description	Manage stakeholder expectations and relationships through effective communication, negotiation and alignment of their needs with the organization's or human resource (HR) objectives					
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development 					Human resources 
Relevant job families	Business Analysis	Vendor/Agency management	Tax planning and operations	Methodology design	Client/account management	Health and safety
Proficiency description	LEVEL 1 - Identify key stakeholders - Assist in gathering stakeholder feedback - Understand the importance of effective communication - Assist in documenting stakeholder roles, interests, and expectations - Learn and apply basic communication techniques to maintain stakeholder relationships LEVEL 2 - Analyze stakeholder needs to align with organizational objectives - Support the management of stakeholder relationships - Contribute to negotiating agreements - Develop and use stakeholder maps to analyze influence and interest levels - Collaborate with teams to create targeted communication plans for stakeholder groups LEVEL 3 - Facilitate conflict resolution among stakeholders with conflicting priorities - Monitor stakeholder satisfaction through surveys/ feedback mechanisms and implement improvement strategies - Facilitate communication and negotiation with stakeholders to ensure alignment with objectives - Collaborate with teams to manage stakeholder expectations LEVEL 4 - Review comprehensive stakeholder engagement initiatives - Develop methodologies for managing stakeholder relationships - Evaluate the effectiveness of engagement practices - Lead stakeholder alignment workshops to foster collaboration and strategic goal alignment - Develop enterprise-wide frameworks for consistent and effective stakeholder management LEVEL 5 - Drive strategic direction for stakeholder management - Establish frameworks for ongoing stakeholder engagement - Set vision for aligning stakeholder needs with organizational goals - Innovate stakeholder engagement approaches using digital tools and platforms for broader reach and efficiency					

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Strategic research

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 		
Skill name	Strategic research		
Skill description	Research on a concept or idea to provide inputs for content development by applying best practices and ensuring alignment with organizational strategies for long-term improvement opportunities		
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 		
Relevant job families	Statistical Analysis and Interpretation	Content creation	Business Analysis
Proficiency description	LEVEL 1 - Understand basic principles of strategic research - Assist in collecting relevant data - Recognize the importance of informed content development LEVEL 2 - Analyze research data to provide insights for content creation - Support the application of best practices in research methodologies - Contribute to aligning research with organizational strategies LEVEL 3 - Facilitate comprehensive strategic research initiatives to identify long-term improvement opportunities - Collaborate with teams to ensure research relevance - Assess research alignment with business goals LEVEL 4 - Review initiatives for advanced strategic research - Develop methodologies for conducting in-depth research - Evaluate the impact of research on content development LEVEL 5 - Drive strategic direction for organizational research - Establish frameworks for continuous research improvement - Set vision for enhancing research contributions to organizational strategies		

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Strategic service excellence management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Strategic service excellence management	
Skill description	Establish strategies and operating principles to consistently meet and manage clients' expectations so as to support business requirements	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Methodology design	Research planning and strategy
Proficiency description	LEVEL 1 - Recognize basic elements of service excellence - Assist in documenting client expectations - Understand the importance of client satisfaction LEVEL 2 - Analyze client feedback to inform service strategies - Support the establishment of service management principles - Contribute to monitoring service quality LEVEL 3 - Facilitate the development of service excellence strategies that meet client expectations - Collaborate with teams to ensure alignment with business requirements - Assess service delivery effectiveness LEVEL 4 - Assess comprehensive service excellence management initiatives - Develop methodologies for aligning services with client needs - Evaluate the effectiveness of service strategies LEVEL 5 - Drive strategic direction for service excellence - Establish frameworks for ongoing service improvement - Set vision for achieving exceptional service delivery aligned with organizational goals	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Strategy design

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 											
Skill name	Strategy design											
Skill description	Apply traditional design principles to address systemic problems by utilizing strategic practices, systems thinking, and futures thinking to create effective, innovative, and forward-looking solutions that align with organizational goals											
Sub-sector	Legal 		Accounting and auditing 		Management consulting services 		Marketing advertising and market research 		Research and development 		Human resources 	
Relevant job families	Product management & innovation	Intellectual property services	Project management	Expert network management	Client/account management	Marketing & communication	Marketing planning and management	Branding management	HR Business Partner	Talent management	Learning and development management	Performance and rewards management
Proficiency description	LEVEL 1 - Understand basic principles of strategy design - Assist in gathering relevant data - Recognize the importance of aligning strategies with goals											
	LEVEL 2 - Analyze systemic problems to inform strategy development - Support the application of traditional design principles - Contribute to creating innovative solutions											
	LEVEL 3 - Facilitate the design of effective strategies that address systemic issues - Collaborate with teams to ensure alignment with organizational goals - Assess the impact of designed strategies											
	LEVEL 4 - Lead initiatives for comprehensive strategy design - Develop methodologies for utilizing systems thinking in strategy development - Evaluate the effectiveness of strategic solutions											
	LEVEL 5 - Drive strategic direction for organizational strategy design - Establish frameworks for innovative solution development - Set vision for aligning strategies with long-term organizational objectives											

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Strategy development and implementation management

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Strategy development and implementation management				
Skill description	Develop and implement organizational strategic plans by analyzing internal and external factors, and provide direction through the creation of strategies and policies in consultation with relevant stakeholders				
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 				
Relevant job families	Business Analysis	Vendor/Agency management	Methodology design	Client/account management	Health and safety
Proficiency description	LEVEL 1 - Recognize basic elements of strategy development - Assist in documenting strategic plans - Understand the importance of stakeholder consultation				
	LEVEL 2 - Analyze internal and external factors influencing strategy - Support the implementation of strategic plans - Contribute to monitoring strategic progress				
	LEVEL 3 - Facilitate the development of comprehensive strategic plans through stakeholder consultation - Collaborate with teams to ensure alignment with organizational goals - Assess the effectiveness of strategy implementation				
	LEVEL 4 - Monitor comprehensive strategy development and implementation initiatives - Develop methodologies for analyzing organizational factors - Evaluate the impact of strategies on business performance				
	LEVEL 5 - Drive strategic direction for organizational strategy development - Establish frameworks for continuous strategic improvement - Set vision for aligning strategies with organizational objectives				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Sustainability reporting

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 	
Skill name	Sustainability reporting	
Skill description	Ability to prepare a comprehensive sustainability reports that transparently communicate the company's ESG performance, progress, and initiatives to stakeholders and the public, fostering trust and accountability	
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 	
Relevant job families	Regulatory compliance reporting	Accounting Analysis and Reporting
Proficiency description	LEVEL 1 - Understand basic principles of sustainability reporting - Assist in gathering data for reports - Recognize the importance of transparency in reporting LEVEL 2 - Analyze sustainability data to inform report development - Support the preparation of comprehensive reports - Contribute to aligning reports with ESG standards LEVEL 3 - Facilitate the creation of sustainability reports that effectively communicate ESG performance - Collaborate with teams to ensure accuracy and relevance of reports - Assess report effectiveness LEVEL 4 - Lead initiatives for comprehensive sustainability reporting - Develop methodologies for preparing transparent and impactful reports - Evaluate stakeholder engagement with sustainability initiatives LEVEL 5 - Drive strategic direction for sustainability reporting - Establish frameworks for ongoing reporting improvement - Set vision for enhancing transparency and accountability in ESG reporting	

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Systems thinking application

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 							
Skill name	Systems thinking application							
Skill description	Understand complexity of cause-and-effect relationships of systems and processes across the organization, as well as evaluate systems based on value-creation and contribution to specific issues							
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 							
Relevant job families	Business Analysis	Regulatory compliance reporting	Research and analytics	Expert network management	Product management and innovation	Client/account management	Project management	Methodology design
Proficiency description	LEVEL 1 - Recognize basic concepts of systems thinking - Assist in identifying relationships within processes - Understand the importance of evaluating systems LEVEL 2 - Analyze cause-and-effect relationships in organizational processes - Support the application of systems thinking methodologies - Contribute to evaluating system contributions LEVEL 3 - Facilitate the application of systems thinking to address complex issues - Collaborate with teams to assess system value-creation - Assess the effectiveness of systems in achieving organizational goals LEVEL 4 - Lead comprehensive initiatives for applying systems thinking - Develop methodologies for analyzing system interdependencies - Evaluate the overall impact of systems on organizational performance LEVEL 5 - Drive strategic direction for systems thinking application - Establish frameworks for integrating systems thinking into organizational strategies - Set vision for enhancing system effectiveness in achieving objectives							

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Technical report writing

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 				
Skill name	Technical report writing				
Skill description	Produce reports with specific information and evidence presented in a clear and structured format				
Sub-sector	Legal 	Accounting and auditing 	Management consulting services 	Marketing advertising and market research 	Research and development  Human resources 
Relevant job families	Project management	Quality assurance and control	Ethnographic/scientific research	Methodology design	Health and safety
Proficiency description	LEVEL 1 - Draft clear and concise emails, reports, and meeting summaries - Use standard templates for documentation under supervision - Proofread documents to ensure clarity and grammatical accuracy - Organize technical content logically for ease of understanding				
	LEVEL 2 - Write user manuals and operational guides with detailed instructions - Incorporate visuals like flowcharts or tables to enhance understanding - Revise technical documents based on feedback from stakeholders - Ensure compliance with organizational or industry writing standards				
	LEVEL 3 - Develop comprehensive technical documentation for complex systems or processes - Create style guides and templates for standardized documentation - Collaborate with subject matter experts to ensure technical accuracy - Coordinate multiple documentation projects, ensuring timely delivery and quality				
	LEVEL 4 - Review and approve technical content created by team members - Oversee large-scale documentation efforts across projects - Lead training sessions on advanced technical writing techniques - Integrate multimedia (e.g., videos, infographics) into technical materials				
	LEVEL 5 - Innovate documentation approaches using emerging technologies like AI or AR - Establish industry standards for effective technical communication				

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Technical skill charter

Trademark application

 Sub-sectors applicable for the skill

Sector	Professional and Consulting Services 
Skill name	Trademark application
Skill description	Prepare and review trademark applications, ensuring accuracy and compliance with legal requirements to secure intellectual property rights effectively
Sub-sector	Legal  Accounting and auditing  Management consulting services  Marketing advertising and market research  Research and development  Human resources 
Relevant job families	Intellectual property services
Proficiency description	LEVEL 1 - Understand basic principles of trademark application - Assist in gathering necessary documentation - Recognize the importance of intellectual property rights LEVEL 2 - Analyze trademark requirements to inform application processes - Support the preparation of accurate applications - Contribute to ensuring compliance with legal standards LEVEL 3 - Facilitate the preparation and review of trademark applications - Collaborate with teams to ensure accuracy in submissions - Assess alignment with legal requirements LEVEL 4 - Assess comprehensive trademark application initiatives - Develop methodologies for reviewing and securing intellectual property rights - Evaluate effectiveness of trademark strategies LEVEL 5 - Drive strategic direction for intellectual property management - Establish frameworks for ongoing trademark protection - Set vision for enhancing organizational compliance with intellectual property laws

Note: The highlighted sub-sector requires the aforementioned skill at various levels for different jobs across the job family

Introduction to general skill charters

As part of the Professional and Consulting Services Skills Dictionary, General skill charters are developed for **21 general skills, which are derived from National Skills Framework**.

General skill charters are based on the **general skills development framework** known as **A (Audience) – B (Behavior) – C (Context) – D (Degree)**

Audience	Who is it targeting – implied for all job families
Behaviour	Practical application of behaviours that distinguish one proficiency-level from another
Context	Dimensions of knowledge which provide differentiation between two proficiency levels
Degree	Degree to which the individual needs to be assessed – defined by proficiency levels

Additionally, **general skills adopt 3 proficiency levels:**
Fundamental (Level 1), Diverse (Level 2), Thorough (Level 3).

Fundamental: At this level, professional has a **foundational knowledge of the skill**, including **key concepts and principles at an acceptable level but limited breadth**

Diverse: At this level, professional **has a deeper knowledge of the skill, including more nuanced concepts and principles**. They **can perform a wider range of tasks** related to the skill and may be able to adapt their knowledge to different situations

Thorough: At this level, professional has **deep knowledge of skill concepts and principles**. They can **perform all tasks related to the skill** with a high degree of proficiency, and drive a culture centered around the importance of the skill

Introduction to general skill charters

General Skill charters present in the subsequent section are designed keeping in mind the general skills development framework and the **proficiency level definitions** as per global practices. The charters entail the following elements:

- (1) Skill **description**
- (2) Relevant **skill type** that is applicable to the skill
- (3) Relevant **skill indicators** that are applicable to the skills
- (4) **Proficiency descriptions** (on a scale of Levels 1-3)

Skill description	Offers a detailed explanation of the skill, its scope, purpose, and relevance . It outlines what the skill entails and how it applies to the work environment
Skill type	The general skills are categorized into 5 categories that specify nature of the general skill in question: • Foundational: Basic skills required across roles in the sector • Personal: Skills related to individual awareness and understanding of strengths and weaknesses • Social: Skills targeted to enable building of inter-personal relationships and positive team dynamics • Analytical: Skills related to the application of mental capacity/ cognitive thinking to build an understanding • Future forward: Skills required to remain relevant in the sector given the constantly evolving industry needs
Skill indicators	Skill indicators are assessment metrics based on skill definition
Proficiency descriptions	Offers the description on the expected performance to be showcased for progression. General skills' proficiency is measured on a scale starting from Level 1 and progressing to Level 3. The level definitions are aligned with the generally adopted levels – Fundamental, Diverse and Thorough • Level 1: At this level, professional has a foundational knowledge of the skill, including key concepts and principles at an acceptable level but limited breadth • Level 2: At this level, professionals apply more nuanced concepts and principles related to the skill. They perform a wider range of tasks related and are able to adapt their knowledge to different situations • Level 3: At this level, professionals apply deep knowledge of skill concepts and principles. They perform all tasks related to the skill with a high degree of proficiency, and drive a culture centered around importance of the skill

General skill charter

Digital Literacy

 Skill-type applicable for the skill

Skill name	Digital Literacy					
Skill description	Safely use digital technology and tools to find, manage, apply, create, and share information					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Stay up to date with technological and digital advancements		Understand how to use broadly used digital technology and tools		Navigate digital tools and platforms safely (cybersecurity)	
Proficiency description	LEVEL 1 - Fundamental knowledge of digital technologies and tools broadly used in society for general purposes - Fundamental knowledge of the need for and impact of relevant digital tools and platforms for personal productivity - Fundamental knowledge of the risk associated with digital tools - Understand relevant digital tools and technological advances and how they might improve productivity - Use limited range of digital tools and technologies under direct supervision - Explain the risks associated with the use of digital tools and follow modeled behavior for safe use of digital tools		LEVEL 2 - Diverse knowledge of digital technologies and tools most relevant to productivity - Diverse knowledge of the techniques for using digital tools and platforms for productivity - Diverse knowledge of the risk associated with digital tools and mitigation methods - Identify relevant digital tools and technological advances based on its potential to improve team productivity - Use diverse range of digital tools and technologies with limited supervision - Exhibit behavior consistent with an understanding of the risks associated with digital tools and how to navigate it safely		LEVEL 3 - Thorough knowledge of key trends in technological development that fosters awareness of the digital tools of the near future - Thorough knowledge of the strategies available for using digital tools and platforms most productively - Thorough knowledge of the risk associated with digital tools and mitigation strategies - Implement relevant digital tools and technological advances based on its potential to improve organizational productivity - Independently use wide range of digital tools and technologies - Model behavior consistent with the safe and effective use of digital tools and drive the safe practices across the organization	

General skill charter

Literacy

 Skill-type applicable for the skill

Skill name	Literacy				
Skill description	Read, write, speak and listen to understand the world and communicate effectively in diverse contexts				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Read and comprehend a variety of written materials in different contexts and for different purposes	Write clearly and effectively for a variety of audiences	Listen and respond coherently	Use digital tools (e.g., word processing software)	
Proficiency description	LEVEL 1 - Read basic texts to advance knowledge and skills - Use the written medium to convey simple concepts - Offer a cohesive response after listening to a conversation - Use relevant digital tools for literacy with assistance		LEVEL 2 - Comprehend intermediate texts by exhibiting a detailed understanding - Use the written medium to convey concepts to a wide range of readers - Offer a thoughtful response by comprehending the general context of a conversation - Apply relevant digital tools for literacy with limited guidance		LEVEL 3 - Make sense of advanced texts by critically examining the content and inferring the most relevant information - Use the written medium to convey advanced concepts and tailor the content for a broad spectrum of readers - Offer an insightful response by making sense of complex verbal arguments and critically examining the context - Evaluate relevant digital tools for literacy independently

General skill charter

Numeracy

 Skill-type applicable for the skill

Skill name	Numeracy				
Skill description	Find, understand, use, and report mathematical information presented through words, numbers, symbols, and graphics				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Comprehend key mathematical information in activities or texts	Interpret tabular data and graphical representations (e.g., diagrams, maps, schematics, charts, graphs or tables)	Carry out mathematical operations	Use digital tools (e.g., calculator)	
Proficiency description	LEVEL 1 - Interpret mathematical information in oral instructions and written texts where the mathematics is partially embedded - Comprehend information presented in tabular data and graphical representations - Use simple arithmetic operations in daily life - Use common digital tools for numeric tasks under supervision		LEVEL 2 - Explain mathematical information embedded in a range of familiar, and some less familiar, tasks and texts - Represent information effectively in diagrams, maps, schematics, charts, graphs or tables - Apply mathematical concepts in context requiring quantitative assessment - Apply specific digital tools for numeric tasks with limited supervision		LEVEL 3 - Gauge the mathematical information embedded in a range of tasks and texts - Analyze information from diagrams, maps, schematics, charts, graphs or tables effectively - Employ advanced mathematics in a range of contexts including processing of data and information - Adapt digital tools for numeric tasks independently in specific situations

General skill charter

Financial literacy

 Skill-type applicable for the skill

Skill name	Financial Literacy					
Skill description	Use various financial skills to effectively manage personal finances					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Navigate financial concepts in everyday context Manage personal finances (spending, savings, etc.)		Employ safe financial practices (including fraud prevention)		Use digital tools (e.g., online banking, digital payments, budgeting tools)	
Proficiency description	LEVEL 1 - Fundamental knowledge of financial concepts needed to navigate daily activities - Fundamental knowledge of approaches to control personal financial resources to achieve financial stability - Fundamental knowledge of the steps involved in identifying potential financial risks - Fundamental knowledge of common digital tools used for financial literacy - Perform basic financial tasks to navigate daily activities such as calculating prices and costs - Perform personal budget planning under supervision - Follow approaches to identify personal financial risks and fraud - Use common financial digital tools with assistance		LEVEL 2 - Diverse knowledge of financial management techniques for daily activities - Diverse knowledge of effective techniques to control personal financial resources to achieve financial stability - Diverse knowledge of the techniques involved in ensuring the safety and security of financial information and transactions - Diverse knowledge of specific digital tools used for financial literacy - Apply financial concepts to read and understand bills, invoices, or bank statements - Manage budget planning for a team, with limited supervision - Identify financial risks and fraud in a broader team environment - Apply specific financial digital tools with limited guidance		LEVEL 3 - Thorough knowledge of strategies to manage finances - Thorough knowledge of strategies to control personal financial resources to achieve financial sustainability - Thorough knowledge of the strategies involved in preventing financial fraud - Thorough knowledge of approaches to adapt digital tools needed for specific situations - Develop a system for effectively managing income and expenditure - Design a budget plan for an organization - Redesign approaches to identify financial risks and fraud within an organization - Adapt financial digital tools for specific situations	

General skill charter

Health literacy

 Skill-type applicable for the skill

Skill name	Health Literacy					
Skill description	Access, understand, and regularly practice valid healthy habits to achieve and maintain good mental, emotional, and physical health					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Develop awareness and knowledge of health and fitness concepts and scientifically proven information		Achieve and maintain good mental and physical health (including stress management)		Use digital tools (e.g., health tracking tools and gadgets, personalized nutrition tools, online guided meditations)	
Proficiency description	LEVEL 1 - Fundamental knowledge of the need for a healthy diet and regular exercise and the associated risks - Fundamental knowledge of the approaches in maintaining good mental and physical health - Fundamental knowledge of common digital tools used for health and fitness - Exhibit personal awareness for a healthy diet and regular exercise - Habitually perform common activities related to good mental and physical health - Use common digital tools to monitor health and fitness		LEVEL 2 - Diverse knowledge of the types of healthy diet and exercise techniques and associated risks - Diverse knowledge of the techniques in maintaining good mental and physical health - Diverse knowledge of specific digital tools used for health and fitness - Raise awareness within a team about the need for a healthy diet and regular exercise - Habitually perform personalized activities related to good mental and physical health - Apply specific digital tools to personalize health and fitness plans		LEVEL 3 - Thorough knowledge of proven health and fitness strategies - Thorough knowledge of the strategies in maintaining good mental and physical health - Thorough knowledge of approaches to adapt digital tools needed for specific health and fitness needs - Drive awareness across the organization about the need for a healthy diet and regular exercise - Improve activities related to good mental and physical health based on its personal and organizational effectiveness - Adapt digital tools to drive organizational health and fitness	

General skill charter

Learning to learn

 Skill-type applicable for the skill

Skill name	Learning to Learn					
Skill description	Deploy different approaches that enable continuous independent learning dexterities across different contexts to drive self-development and the achievement of long-term career goals					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Recognize learning needs	Find learning opportunities and channels	Remain curious and adopt a growth and development mindset	Be open to learn and unlearn	Use existing skills to build new ones and learn fast	Use digital tools (e.g., online tutorials, e-learning)
Proficiency description	LEVEL 1 - Fundamental knowledge of the need for learning and development - Fundamental knowledge of relevant learning opportunities available - Fundamental knowledge of the need to be curious - Fundamental knowledge of the importance of being receptive to learning - Fundamental knowledge of the difference in skill types - Fundamental knowledge of common digital tools available for learning - Understand personal learning needs and goals - Describe relevant learning opportunities - Explain how curiosity contributes to growth and development - Follow a model of openness to new information that challenges deeply held convictions - Be aware of how different skills converge in a general context and how it amplifies learning - Use common digital tools for learning		LEVEL 2 - Diverse knowledge of the impact of learning on personal development - Diverse knowledge of approaches for finding learning opportunities and channels - Diverse knowledge of the need for a growth-oriented mindset - Diverse knowledge of the importance of being open to both learning and unlearning - Diverse knowledge of the techniques to build on current skills to learn new ones - Diverse knowledge of specific digital tools available for learning - Identify team learning needs and goals - Discover relevant learning opportunities based on development potential - Exhibit curiosity in a team context to drive team growth and development - Exhibit openness to new information challenging deeply held convictions in a team context - Apply converging skills in a learning environment to learn skills applicable to novel situations - Guide the use of specific digital tools for learning		LEVEL 3 - Thorough knowledge of learning and development strategies - Thorough knowledge of strategies to find learning opportunities and channels - Thorough knowledge of strategies to remain curious and growth-oriented - Thorough knowledge of the importance of being open to both relearning and unlearning a broad scope of information - Thorough knowledge of the converging nature of skills and strategies to build on current skills - Thorough knowledge of approaches to adapt digital tools needed in specific situations - Develop organizational learning goals - Compare relevant learning opportunities to formulate a learning plan - Model curiosity at an organizational level to drive corporate growth and development - Model openness to new information challenging deeply held convictions across the organization - Develop a learning environment where converging skills are used to learn skills applicable to novel situations - Adapt digital tools for effective learning across the org.	

General skill charter

Planning

 Skill-type applicable for the skill

Skill name	Planning				
Skill description	Identify priorities and organize tasks and deliverables based on a given time schedule to manage time and resources effectively				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Prioritize tasks	Coordinate and organize activities	Set goals	Use time management techniques	Use digital tools (e.g., online calendars, task planning and project management solutions)
Proficiency description	LEVEL 1 - Fundamental knowledge of common task prioritization approaches - Fundamental knowledge of approaches to organize activities based on priority - Fundamental knowledge of the approaches in setting long and short-term goals - Fundamental knowledge of approaches to estimate the duration of each activity to develop schedules in timely manner - Fundamental knowledge of common digital tools for planning - Follow pre-defined priorities - Complete personal tasks according to a set plan - Set long and short-term goals for oneself in alignment with overall personal and professional objectives under supervision - Use time management approaches to complete personal activities in a timely manner - Use common digital tools for planning with assistance		LEVEL 2 - Diverse knowledge of task prioritization techniques to account for task importance and urgency - Diverse knowledge of the techniques to organize activities based on priority - Diverse knowledge of the techniques for setting long and short-term goals - Diverse knowledge of techniques to estimate the duration of each activity to develop schedules in timely manner - Diverse knowledge of specific digital tools for planning - Organize activities by priority - Coordinate team activities by assigning tasks, and tracking progress - Establish SMART (Specific, Measurable, Attainable, Relevant, and Time-bound) goals that are aligned with the overall objectives of the team - Implement time management techniques, to manage a team's time effectively with limited supervision - Apply specific digital tools for planning with limited guidance		LEVEL 3 - Thorough knowledge of task prioritization strategies based on task importance and urgency - Thorough knowledge of strategies to organize activities based on priority considering interdependencies - Thorough knowledge of strategies for setting long and short-term goals - Thorough knowledge of strategies to estimate the duration of each activity to develop schedules in timely manner - Thorough knowledge of the approaches to adapt digital tools needed in specific situations in planning - Define priorities considering multiple factors such as risk, resource availability, and strategic importance - Plan organizational activities independently, identifying interdependencies and accounting for them in advance - Drive a goal-oriented culture by establishing challenging and inspiring organizational goals that push beyond the status quo - Set time management best practices to maximize productivity and efficiency - Adapt planning digital tools independently in specific situations

General skill charter

Self-management

 Skill-type applicable for the skill

Skill name	Self-management					
Skill description	Regulate behaviors, thoughts, and emotions in an introspective process to productively serve personal, work, and public activities					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Regulate behavior, thoughts, and emotions in a productive way		Develop and maintain a positive personal brand		Develop self-care techniques	
Proficiency description	LEVEL 1 - Fundamental knowledge of the need to be aware of one's behavior, thoughts, and emotions - Fundamental knowledge of the need for a positive brand associated with oneself - Fundamental knowledge of the need for self-care and its benefits for overall well-being - Understand productive ways to regulate one's behavior, thoughts, and emotions - Consider one's brand, how it is perceived, builds trust and signals authenticity - Be aware of effective self-care techniques		LEVEL 2 - Diverse knowledge of the need to manage one's behavior, thoughts, and emotions and their impact on productivity - Diverse knowledge of the impact of a positive brand associated with oneself - Diverse knowledge of different self-care techniques and knowledge of the techniques to apply them in daily life - Implement productive ways to regulate team behavior, thoughts, and emotions - Examine a team's brand and proactively manage how the team is perceived - Apply effective self-care techniques		LEVEL 3 - Thorough knowledge of the need to regulate one's behavior, thoughts, and emotions for maximum productivity - Thorough knowledge of the strategic implications of a positive brand - Thorough knowledge of self-care strategies and an advanced knowledge of how to apply them - Develop most productive ways to regulate behavior, thoughts, and emotions organizationally - Develop a brand strategy for the organization - Develop effective self-care techniques	

General skill charter

Communication

 Skill-type applicable for the skill

Skill name	Communication				
Skill description	Convey concepts and ideas and express emotions using written, verbal or other mediums to relay the understanding to others				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Convey information, ideas, concepts, thoughts, and feelings orally and in writing	Develop effective listening techniques	Adjust communication based on the audience (presentation style, communication channel, vocabulary, etc.)	Use digital tools (e.g., email, online presentations)	
Proficiency description	LEVEL 1 - Fundamental knowledge of every-day vocabulary and grammar for oral and written communication - Fundamental knowledge of different means of communication (e.g., emails, reports, presentations) to convey information orally and in writing - Fundamental knowledge of approaches for active listening, tailoring communication to different audiences, and common digital tools for written and oral communication - Use simple language and basic communication channels for clear written and oral communication - Listen actively to others, asking good questions to clarify understanding - Select the right vocabulary for the audience - Use common digital tools for communication with assistance - Use basic visual aids such as PowerPoint or charts to support presentations - Learn to structure messages effectively using standard formats (e.g., emails, memos, or basic reports) - Seek and incorporate feedback to refine communication and presentation techniques		LEVEL 2 - Diverse knowledge of formal vocabulary and grammar for oral and written communication - Diverse knowledge of different techniques of communication (e.g., emails, reports, presentations) to convey information, ideas, concepts, thoughts, and feelings orally and in writing - Diverse knowledge of techniques for active listening, tailoring communication to different audiences, and specific digital tools for written and oral communication - Communicate complex ideas and information orally and in writing using diverse channels - Apply effective listening techniques to understand and respond appropriately to a group's perspectives and concerns - Tailor communication style and vocabulary to the audience for effective communication - Apply specific digital tools for communication with limited guidance - Incorporate storytelling techniques to make presentations more engaging and impactful - Use data visualization tools like Tableau or advanced PowerPoint features for enhanced clarity		LEVEL 3 - Thorough knowledge of literary vocabulary and grammar for oral and written communication - Thorough knowledge of different strategies of communication (e.g., emails, reports, presentations) to convey information, ideas, concepts, thoughts, and feelings orally and in writing - Thorough knowledge of strategies for active listening, tailoring communication to different audiences, and the approaches to adapt digital tools needed in specific situations - Present complex ideas orally using advanced grammar, spelling, and punctuation skills - Produce high-quality, persuasive written documents using advanced grammar, spelling, and punctuation skills - Drive a culture of effective listening and open communication - Develop audience-specific communication style, channel, and vocabulary for effective communication - Adapt digital tools to drive organizational communication - Develop organization-wide communication frameworks to standardize messaging - Leverage emerging technologies, such as AI-driven speech analytics, to refine communication strategies

General skill charter

Cultural intelligence

 Skill-type applicable for the skill

Skill name	Cultural Intelligence					
Skill description	Recognize different, diverging worldviews and determine through productive engagement to understand and demonstrate respect towards individuals and groups that have different worldviews					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Recognize the existence of different and diverging worldviews		Determine to understand and demonstrate respect towards individuals and groups with those worldviews		Engage productively with individuals and groups with different worldviews	
Proficiency description	LEVEL 1 - Fundamental knowledge of the existence of diverging worldviews, cultural biases, and implicit assumptions - Fundamental knowledge of approaches to show respect towards individuals and groups with different worldviews - Fundamental knowledge of inclusive language and behaviors - Recognize that different people have different worldviews - Act respectfully towards people with different worldviews - Acknowledge the importance and benefits of diverse viewpoints in personal development		LEVEL 2 - Diverse knowledge of ways to recognize different and diverging worldviews, cultural biases, and implicit assumptions - Diverse knowledge of techniques of showing respect towards individuals and groups with different worldviews - Diverse knowledge of techniques for engaging productively with individuals and groups with different worldviews - Discover views that are different from one's own - Instill respect towards people with different worldviews within a team - Seek diverse viewpoints within a team to improve team results		LEVEL 3 - Thorough understanding of the impact of cultural biases and implicit assumptions on diverging worldviews - Thorough understanding of strategies for developing a culture of respect for individuals and groups with different worldviews - Thorough knowledge of strategies for creating an inclusive environment for individuals and groups with different worldviews - Lead initiatives to foster cross-cultural communication and collaboration to understand different worldviews - Promote a culture of respect at an organization level - Drive initiatives that promote inclusion, including developing policies and practices that support diversity and equity within an organization	

General skill charter

People management

 Skill-type applicable for the skill

Skill name	People Management				
Skill description	Empower others to learn and develop capabilities to enhance performance and achieve personal and/or professional goals				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Support, prepare, and empower people	Manage diverse stakeholders	Provide/receive constructive feedback	Display trust and integrity	
Proficiency description	LEVEL 1 - Fundamental knowledge of the benefits of supporting people - Fundamental knowledge of approaches to manage diverse stakeholders - Fundamental knowledge of the approaches for giving and receiving constructive feedback - Fundamental knowledge of the importance of trust and integrity in building relationships - Support team members to complete tasks and responsibilities - Show respect for colleagues from diverse backgrounds - Ask for constructive feedback to help find solutions to personal areas of improvement - Exhibit integrity in personal interactions with others		LEVEL 2 - Diverse knowledge of the benefits of preparing people for a specific context - Diverse knowledge of techniques used to manage diverse stakeholders - Diverse knowledge of the techniques used to give and receive constructive feedback - Diverse knowledge of the techniques in building trust and integrity in relationships - Prepare others to execute tasks and responsibilities - Manage an inclusive environment for diverse inputs in a team environment - Give constructive feedback to team members, while also being receptive to feedback from the team - Encourage integrity and honesty in a team environment		LEVEL 3 - Thorough knowledge of the benefits of and strategies of empowering people - Thorough knowledge of the strategies used to manage diverse stakeholders - Thorough knowledge of the strategies employed in giving and receiving constructive feedback - Thorough knowledge of the strategies to build of trust and integrity in relationships - Empower others to build skills and capabilities - Develop a thriving environment for diverse inputs across the organization - Develop a culture of receiving and giving constructive feedback across the organization - Develop a culture of trust, honesty, and integrity across the organization

General skill charter

Emotional intelligence

 Skill-type applicable for the skill

Skill name	Emotional Intelligence					
Skill description	Capacity to recognize, understand, and manage emotions in oneself and others to enhance relationships and decision-making					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Recognize and understand emotions in oneself and others		Manage and regulate one's own emotions		Empathize with others and respond appropriately	
Proficiency description	LEVEL 1 - Fundamental knowledge of the importance of recognizing and understanding emotions in oneself and others - Fundamental knowledge of the need to manage and regulate one's own emotions - Fundamental knowledge of the importance of empathy and appropriate responses to others' emotions - Understand productive ways for recognizing and understanding emotions in oneself and others - Understand basic strategies for managing and regulating one's own emotions - Understand basic strategies for empathizing with others and responding appropriately to their emotions		LEVEL 2 - Diverse knowledge of advanced strategies to identify and understand emotions in oneself and others - Diverse knowledge of advanced techniques to manage and regulate one's own emotions - Implement productive ways to identify and understand emotions in oneself and others - Apply effective techniques to demonstrate empathy and respond appropriately to others' emotional states		LEVEL 3 - Thorough knowledge of the need to regulate one's emotions for maximum productivity - Thorough knowledge of the strategic implications of emotional intelligence - Thorough knowledge of the most effective methods to demonstrate empathy and respond appropriately to others' emotional states - Develop most productive ways to regulate emotions organizationally - Develop new and innovative strategies to identify and understand emotions in oneself and others	

General skill charter

Teamwork

 Skill-type applicable for the skill

Skill name	Teamwork				
Skill description	Manage relationships with people in teams and work collaboratively and effectively with others to achieve collective goals				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Collaborate with and support teammates	Manage conflict within the team	Follow defined roles within the team	Contribute to achieve team's goal	Use digital tools (e.g., shared drives and documents)
Proficiency description	LEVEL 1 - Fundamental knowledge of methods to collaborate effectively - Fundamental knowledge of approaches to manage conflicts - Fundamental knowledge of one's roles and responsibilities as well as those of others - Fundamental knowledge of the importance and the approaches for fulfilling one's role to achieve team goals - Fundamental knowledge of common digital tools used for teamwork - Collaborate actively with team members to achieve desired aims under supervision - Follow guidelines for managing conflicts in a team setting with help - Understand the roles and responsibilities of team members under supervision - Perform the assigned roles and responsibilities in a team setting to achieve desired aims under supervision - Use common digital tools for teamwork with help		LEVEL 2 - Diverse knowledge of techniques to collaborate effectively - Diverse knowledge of techniques to manage conflicts - Diverse knowledge of the techniques used to assign and satisfy roles and responsibilities - Diverse knowledge of the importance and the techniques for fulfilling one's role to achieve team goals and support others in fulfilling theirs - Diverse knowledge of specific digital tools used for teamwork - Manage team members to achieve desired aims with limited guidance - Apply range of strategies to manage conflicts in a team setting with limited guidance - Clarify the roles and responsibilities of team members with limited supervision - Manage the assigned roles and responsibilities in a team setting to achieve desired aims with limited guidance - Apply specific digital tools for teamwork with limited guidance		LEVEL 3 - Thorough knowledge of strategies to collaborate effectively - Thorough knowledge of strategies to manage conflicts - Thorough knowledge of the strategies used to manage talent, assign roles and responsibilities to ensure optimal organizational performance - Thorough knowledge of the importance and the strategies for fulfilling one's role to achieve team goals - Thorough knowledge of methods to adapt digital tools needed in specific situations - Lead an organization to achieve desired aims - Develop a positive culture that supports conflict resolution and negotiation among team members - Develop the roles and responsibilities of team members independently - Lead the assigned roles and responsibilities in a team setting to achieve desired aims - Adapt digital tools to drive teamwork on an organizational level

General skill charter

Critical-thinking

 Skill-type applicable for the skill

Skill name	Critical-thinking				
Skill description	Examine, analyze, interpret, evaluate, and connect ideas from multiple perspectives showing reasoning in a variety of fields with differing assumptions, content and methodologies to make a judgement				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Examine the context and apply assumptions	Assess facts, information, sources, opinions, and processes	Connect problems and ideas to each other and to the bigger picture	Make a judgment	Use digital tools (e.g., tools that promote and enhance metacognition in students)
Proficiency description	LEVEL 1 - Fundamental knowledge of approaches to examine the context and a basic grasp of the theoretical meaning of assumptions - Fundamental knowledge of approaches to assess facts, information, sources, opinions, and processes - Fundamental knowledge of how problems and ideas connect to each other and to the bigger picture - Fundamental knowledge of the meaning of making a judgment - Fundamental knowledge of common digital tools for critical thinking - Discuss the context and explain assumptions where needed with help - Review facts, information, sources, opinions, and processes - Display the ability to connect diverging aspects to each other and discuss their collective implication for the broader situation - Discuss the assessed information to help in distinguishing different options - Use common digital tools with help to support critical thinking for the individual		LEVEL 2 - Diverse knowledge of techniques to examine the context and an intermediate grasp of the theoretical meaning of assumptions - Diverse knowledge of techniques to assess facts, information, sources, opinions, and processes - Diverse knowledge of how problems and ideas connect to each other and the bigger picture - Diverse knowledge of the impact of making a judgment - Diverse knowledge of specific digital tools for critical thinking - Explain the context and apply assumptions where needed with limited supervision - Assess facts, information, sources, opinions, and processes - Manage efforts to connect diverging aspects to each other and discover their collective implication for the broader situation - Apply judgment to the assessed information to compare different options - Use specific digital tools with limited help to support critical thinking within a team context		LEVEL 3 - Thorough knowledge of strategies to examine the context and a complete grasp of the theoretical meaning of assumptions - Thorough knowledge of strategies to assess facts, information, sources, opinions, and processes - Thorough knowledge of how problems and ideas connect to each other and the bigger picture - Thorough knowledge of the strategic implications of making a judgment - Thorough knowledge of approaches to adapt digital tools needed in specific situations - Examine the context and apply assumptions where needed independently - Analyze and examine facts, information, sources, opinions, and processes - Reconcile diverging aspects and quantify their collective implication for the broader situation - Examine conclusions and rank options - Adapt digital tools to drive critical thinking on an organizational level

General skill charter

Decision-making

 Skill-type applicable for the skill

Skill name	Decision-making				
Skill description	Choose a course of action from several alternatives considering perspectives from different stakeholders through a structured process to achieve intended goals				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Evaluate options and consider alternative views	Analyze different situations/cases/scenarios and identify critical factors for decision	Determine best course of action	Navigate risk	
Proficiency description	LEVEL 1 - Fundamental knowledge of approaches to evaluate options - Fundamental knowledge of approaches to analyze various situations, cases, and scenarios, and identify decision-making factors - Fundamental knowledge of approaches to identify different courses of action - Fundamental knowledge of approaches to identify and evaluate risks - Support in evaluating decision options, and review alternatives and different perspectives under supervision - Recognize various situations and discuss essential decision-making factors under supervision - Follow a structured decision-making process to determine courses of action under supervision - Discuss risk identification, risk evaluations, and risk mitigation measures under supervision		LEVEL 2 - Diverse knowledge of techniques to evaluate options - Diverse knowledge of techniques to analyze various situations, cases, and scenarios, and identify decision-making factors - Diverse knowledge of methods to determine courses of action - Diverse knowledge of techniques to mitigate risks - Manage the evaluation of decision options, and provide alternatives and different perspectives with limited supervision - Construct various scenarios and identify essential decision-making factors with limited supervision - Develop a structured decision-making process to determine and categorize courses of action with limited supervision - Contribute to risk identification, risk evaluations, and the development of risk mitigation measures with limited supervision		LEVEL 3 - Thorough knowledge of strategies to evaluate options - Thorough knowledge of strategies to analyze various situations, cases, and identify decision-making factors - Thorough knowledge of strategies to evaluate and determine the best course of action - Thorough knowledge of strategies to foresee and proactively manage risks - Evaluate decision options, and compare alternatives and different perspectives independently - Evaluate scenarios and critically assess essential decision-making factors independently - Assess and redesign structured decision-making processes independently to determine the best course of action for the organization - Lead risk identification and forecasting and implement proactive risk mitigation measures

General skill charter

Innovation and creative-thinking

 Skill-type applicable for the skill

Skill name	Innovation and Creative-thinking				
Skill description	Demonstrate curiosity, flexibility, and imagination to produce original ideas or solutions to current or novel challenges				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Use imagination and innovative thinking	Apply conceptual thinking by connecting abstract ideas	Anticipate industry shifts and proactively prepare for them	Generate new ideas or combine existing ones to develop innovative, novel solutions	Use digital tools (e.g., tools that enable effective brainstorming)
Proficiency description	LEVEL 1 - Fundamental knowledge of methods to stimulate imaginative and innovative thinking - Fundamental knowledge of the meaning of conceptual thinking - Fundamental knowledge of methods to identify potential systemic changes - Fundamental knowledge with the methods for generating ideas and solutions - Fundamental knowledge of common digital tools used for innovation and creative thinking - Apply imaginative and innovative thinking personally - Discuss connections between abstract ideas and concepts - Be aware of potential changes the person's immediate environment - Support in generating ideas and solutions under supervision - Use common digital tools to support innovation and creative thinking with support - Participate in brainstorming sessions to contribute innovative ideas - Learn basic creative problem-solving techniques such as mind mapping		LEVEL 2 - Diverse knowledge of techniques and digital tools to stimulate innovative thinking, generate creative solutions, identify connections between abstract ideas, and prepare for systemic changes - Manage imaginative and innovative thinking efforts within a team - Identify meaningful connections between abstract ideas and concepts - Manage potential changes and prepare for addressing the in a team context - Manage the generation of creative ideas and solutions with limited supervision - Implement specific digital tools to support innovation and creative thinking with limited support - Use tools like design thinking to explore user-centered solutions - Develop prototypes or pilots to test innovative solutions before full implementation - Leverage emerging technologies to drive creativity in solving organizational challenges		LEVEL 3 - Thorough knowledge of strategies to stimulate innovative thinking and generate novel solutions, including connecting abstract ideas and concepts, anticipating systemic changes, and adapting digital tools to specific situations - Lead the development and fostering of imaginative and innovative thinking across the organization - Develop meaningful connections between abstract ideas and concepts - Develop steps for anticipating changes and proactively managing them in the context of organizational goals and national or global trends - Generate novel ideas and solutions independently - Adapt digital tools to drive organizational innovation and creative thinking - Integrate innovation metrics into organizational performance frameworks to track outcomes - Establish partnerships with external innovation hubs, startups, or academic institutions - Introduce industry-disruptive practices or products that set benchmarks for innovation

General skill charter

Problem-solving

 Skill-type applicable for the skill

Skill name	Problem-solving				
Skill description	Generate effective and efficient solutions to solve problems and capitalize on new opportunities, including through the use of digital technology, communication tools and networks				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Identify problems and their root causes	Develop hypotheses	Produce relevant assessment/analysis and validate hypotheses	Develop and implement solutions	Use digital tools (e.g., AI powered problem-solving tools)
Proficiency description	LEVEL 1 - Fundamental knowledge of the nature of problems and methods for identifying and examining root causes - Fundamental knowledge of the methods to develop hypotheses - Fundamental knowledge of methods used to analyze problems and confirm hypotheses - Fundamental knowledge of methods used for developing solutions - Fundamental knowledge of the common digital tools used for problem solving - Support in identifying problems and examining the potential root causes with guidance - Support in developing hypothesis for a given problem based on limited information - Perform steps involved in analyzing and assessing a problem, by following clear guidelines - Support in identifying solutions to a problem and outlining steps required to execute it - Use common problem-solving digital tools with guidance - Learn to apply structured problem-solving frameworks such as the 5 Whys or Fishbone Diagram - Identify key factors affecting simple decisions and document them for review		LEVEL 2 - Diverse knowledge of the nature of problems, comprehensive hypotheses development, problems analysis, solutions development and creating steps to implement it (incl. data analytics), and specific digital tools utilization - Manage the identification of problems and the examination of potential root causes - Generate multiple hypotheses for a given problem considering various data sources in a team context - Apply steps involved in analyzing and assessing a problem, and guide the team in testing and confirming the hypotheses - Manage the identification of solution to a problem and outline steps to execute it in a team context - Apply specific problem-solving digital tools in a team context - Use cost-benefit analysis or similar techniques to evaluate potential solutions - Collaborate with stakeholders to assess the feasibility of proposed solutions - Integrate data analytics to identify trends and inform decisions on complex problems - Develop and implement risk mitigation strategies for chosen solutions		LEVEL 3 - Thorough knowledge of the nature of problems and strategies for identifying and examining root causes - Thorough knowledge of the strategies to assess hypotheses - Thorough knowledge of strategies in taking measures to anticipate systemic changes - Thorough knowledge with the strategies for generating novel ideas and solutions - Thorough knowledge of approaches to adapt digital tools needed in specific situations - Lead the development and fostering of imaginative and innovative thinking across the organization - Develop meaningful connections between abstract ideas and concepts - Develop steps for anticipating changes and proactively managing them in the context of organizational goals and national or global trends - Generate novel ideas and solutions independently - Adapt digital tools to drive organizational innovation and creative thinking - Develop organization-wide frameworks for problem-solving to ensure consistency - Advocate for the integration of AI and advanced analytics in strategic decision-making processes

General skill charter

Adaptability

 Skill-type applicable for the skill

Skill name	Adaptability				
Skill description	Achieve or adjust goals and behaviors when planned or unplanned changes occur, by planning, staying focused, persisting, and overcoming setbacks of unfamiliar environment in a timely manner				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Adjust priorities based on new information	Handle emergencies and unforeseen circumstances	Modify approach and processes to fit the new and unknown context (including digital environment)	Recover from setbacks	
Proficiency description	LEVEL 1 - Fundamental knowledge of approaches to adjust priorities based on new information or changes - Fundamental knowledge of common types of emergencies and how to manage and respond to them - Fundamental knowledge of approaches on how to select an innovative approach and processes given changes in context, including the use of digital tools - Fundamental knowledge of approaches on how to recover from setbacks, such as by learning from mistakes and moving forward - Adjust plans and priorities based on new information and changing circumstances with assistance - Provide a response to emergencies by managing risk from circumstances with assistance - Follow a new or modified approach and processes that fit the new context - Display resilience while facing setbacks with support		LEVEL 2 - Diverse knowledge of techniques to adjust priorities based on new information or changes - Diverse knowledge of common types of emergencies and unforeseen circumstances and techniques to manage and respond to them - Diverse knowledge of techniques on how to select an innovative approach and processes given changes in context, including the use of digital tools - Diverse knowledge of techniques on how to recover from setbacks, such as by learning from mistakes and moving forward - Adjust plans and priorities based on new information and changing circumstances with limited supervision - Provide an effective response to emergencies by managing risk from unforeseen circumstances with limited supervision - Proactively adapt to new or modified approach and processes that fit the new context - Model resilient behavior to a team with limited support		LEVEL 3 - Thorough knowledge of strategies on how to adjust priorities based on new information or changes in a timely manner - Thorough knowledge of common types of emergencies and unforeseen circumstances and strategies to effectively facilitate a resolve - Thorough knowledge of strategies on how to select an innovative approach and processes given changes in context, including the use of digital tools - Thorough knowledge of strategies on how to recover from setbacks, such as by learning from mistakes and moving forward quickly - Adjust plans and priorities based on new information and changing circumstances independently and in a timely manner - Provide an effective response to emergencies by managing risk from unforeseen circumstances independently - Lead modifications to existing work processes and/or create new ones to better fit the new context, with a focus on continuous improvement - Develop effective risk mitigation techniques and processes to foresee setbacks and quickly recover from them

General skill charter

Information processing

 Skill-type applicable for the skill

Skill name	Information Processing				
Skill description	Collect, organize and process information from one or more sources and effectively distribute that information to one or more audiences				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Use various sources to collect information	Manage and identify key takeaways from large datasets	Identify and flag misleading or false information	Practice mindful information distribution	
Proficiency description	LEVEL 1 - Fundamental knowledge of sources of and approaches used to collect information - Fundamental knowledge of approaches used to extract summary and key themes/takeaways from large sets of data - Fundamental knowledge of approaches for fact checking to identify of false or misleading information at the associated risks - Fundamental knowledge of the risks associated with sharing false or misleading information - Use variety of sources to collect information in a systematic and organized way under supervision - Participate in summarizing key aspects from a broader set of information - Discuss potentially false or misleading information and how to deal with it - Adhere to core ethical guidelines when collecting and distributing information online and offline		LEVEL 2 - Diverse knowledge of techniques used to collect information - Diverse knowledge of techniques used to extract summary and key themes/takeaways from large sets of data - Diverse knowledge of techniques to critically evaluate sources to identify of false or misleading information at the associated risks - Diverse knowledge of the risks associated with the sharing of false or misleading information and the potential impact - Manage variety of sources for data collection and storage with limited supervision - Summarize key aspects from a broader set of information - Verify sources and find signs of misleading or false information prior to reporting findings - Apply the use of ethical principles, information safety and cybersecurity guidelines for collecting, storing and sharing information		LEVEL 3 - Thorough knowledge of information collection strategies - Thorough knowledge of strategies used to extract summary and key themes/takeaways from large sets of data - Thorough knowledge of strategies to evaluate sources to identify of false or misleading information at the associated risks - Thorough knowledge of the risks associated with the sharing of false or misleading information and relevant mitigation strategies - Construct effective processes and systems for information collection and storage - Review summarized reports to drive effective presentation of key facts - Examine reported instances of false or misleading information to drive a culture of credible information usage - Determine ethical guidelines and a culture of mindful and safe information collection, usage, and distribution online and offline

General skill charter

Leadership

 Skill-type applicable for the skill

Skill name	Leadership				
Skill description	Set direction and guide oneself and/or others towards achievement of goals by using visionary and strategic thinking, entrepreneurial mindset, emotional intelligence and understanding of future trends				
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 
Skill indicators	Set visionary, strategic and future ready direction	Oversee progress and drive the implementation of priorities	Inspire and motivate	Take ownership and acknowledge the impact and results of decisions	
Proficiency description	LEVEL 1 - Fundamental knowledge of approaches for setting a strategic direction - Fundamental knowledge of approaches used to oversee progress towards the implementation of priorities - Fundamental knowledge of approaches used to encourage oneself - Fundamental knowledge of taking ownership and assuming responsibility for oneself - Define a strategic direction for oneself to achieve his/her personal goals - Follow the progress made towards the implementation of one's priorities - Display self-motivation and zeal - Accept personal ownership for his/her actions and outcomes of his/her decisions - Observe and document effective leadership behaviors during team activities - Participate in team-building exercises to enhance collaborative skills		LEVEL 2 - Diverse knowledge of techniques used to set a strategic direction - Diverse knowledge of techniques used to oversee progress towards the implementation of priorities - Diverse knowledge of techniques used to encourage and motivate others - Diverse knowledge of taking ownership and assuming responsibility for others - Set a strategic direction for a team to collectively achieve the group's goals - Guide the team to make progress in the implementation of priorities - Motivate and encourage a team - Assume responsibility of team's activities, the resulting impact, and consequences of any shortcomings - Facilitate small team discussions to practice leadership skills - Contribute to identifying high-potential team members for leadership development programs - Design competency-based leadership development programs aligned with organizational needs. - Analyze leadership effectiveness using tools such as 360-degree feedback assessments		LEVEL 3 - Thorough knowledge of strategies to set an ambitious and future ready vision and strategic direction - Thorough knowledge of strategies used to drive progress towards the implementation of priorities - Thorough knowledge of strategies to inspire and motivate others - Thorough knowledge of taking ownership and assuming responsibility for people and results - Drive the organization towards an ambitious and future ready vision through setting a strategic direction - Steer an organization towards a successful implementation of priorities - Inspire and motivate groups of people to encourage and enable organizational excellence - Take ownership and responsibility for organization's activities and their impact - Integrate leadership succession planning into organizational strategies - Innovate leadership frameworks using insights from behavioral science and emerging technologies

General skill charter

Sustainability literacy

 Skill-type applicable for the skill

Skill name	Sustainability Literacy					
Skill description	Develop and apply the knowledge, abilities, values and attitudes needed to live in, develop and support a sustainable and resource-efficient environment					
Skill type	Foundational 	Personal 	Social 	Analytical 	Future forward 	
Skill indicators	Develop awareness about the need for a sustainable approach to resources use and consumption		Adopt sustainable practices in resources consumption		Advocate for and participate (e.g., through volunteering) in promoting sustainable practices in one's broader community	
Proficiency description	LEVEL 1 - Fundamental knowledge of the scarcity of natural resources - Fundamental knowledge of sustainable methods in the use of resources - Fundamental knowledge of the need to promote sustainable practices - Discuss environmental issues to raise personal awareness on sustainable initiatives and their importance - Follow environmentally friendly policies and practices to adhere to the sustainable use of resources - Participate in sustainability initiatives		LEVEL 2 - Diverse knowledge of the importance of preserving natural resources - Diverse knowledge of sustainable techniques in the use of resources - Diverse knowledge of the need to encourage sustainable practices - Clarify environmental issues to support in giving information and raising team awareness on sustainable initiatives - Promote environmentally friendly policies and practices to encourage the sustainable use of resources - Play an active role in promoting sustainability initiatives		LEVEL 3 - Thorough knowledge of the impact of human activities on the environment and availability of natural resources - Thorough knowledge of strategies to use resources most sustainably - Thorough knowledge of the need to advocate for sustainable practices - Examine relevant information to raise organizational awareness on sustainable initiatives - Formulate environmentally friendly policies and practices to foster a culture of sustainable resources consumption - Lead the promotion of sustainability initiatives, including through the establishment of volunteering programs
